

FLEMING'S FARM AND LIVE STOCK ALMANAC 1912

PUBLISHED BY
Fleming Bros.
CHEMISTS
Union Stock Yards Chicago

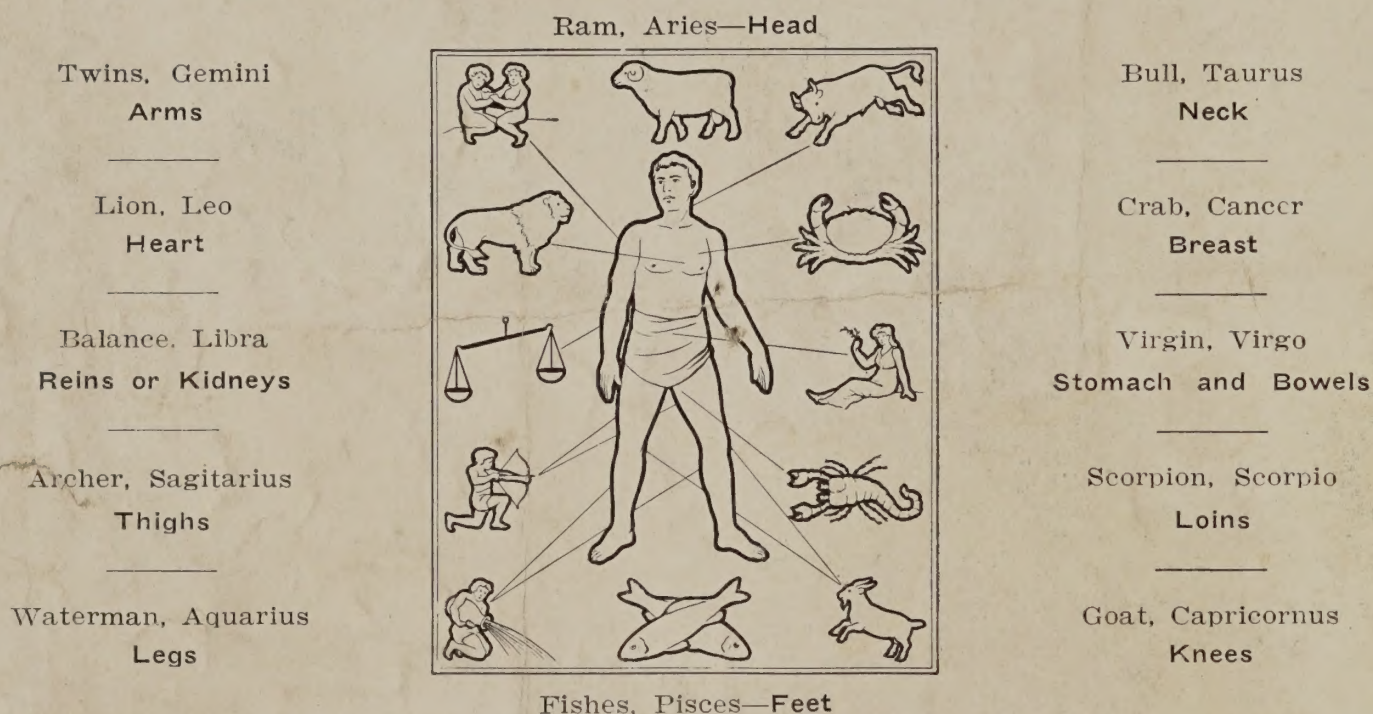

Fleming's Vest-Pocket Veterinary Adviser

Fleming's Veterinary Remedies, though there are several of them, do not afford a suitable treatment for all ailments of horses and cattle. With a view to rendering farmers all the assistance we can in the treatment of their ailing stock, and also with a view to setting forth clearly and adequately the uses and limitations of our own remedies, we have published Fleming's Vest-Pocket Veterinary Adviser. This book contains 192 pages, 69 illustrations, and is durably bound in leatherette. It covers over two hundred veterinary subjects, describing diseases so that you will know how to recognize them by their symptoms, telling you their nature and cause, and what you should do to cure them. The illustration on the back cover of this almanac will afford you a fair idea as

to what the book looks like. We believe it is the best veterinary book ever published to meet the needs of the average farmer, and will gladly mail a copy free of charge to those who believe it would be helpful to them and will write for it.

Because Fleming's Vest-Pocket Veterinary Adviser describes nearly all the diseases of horses and cattle so fully and clearly and may be had for the asking, we shall not take space in this almanac to describe even the diseases that our remedies cure. Instead, we shall describe very briefly the remedies themselves, and devote the major portion of available space to the publication of letters that will afford the reader a fair idea as to the kind of work they do.

The Twelve Signs of the Zodiac

The time may come when you would gladly pay one hundred dollars for a bottle of Fleming's Colic Cure, if such a price could place the remedy in your hands at the moment. Order a bottle now; it costs but one dollar, and is the best Colic protection that you can have. Read the testimonials regarding it.

Fleming's Almanac for 1912

The astronomical data given in this almanac is adapted to the parallel of latitude extending across the United States in approximate line with Newport, R. I.; Wilkesbarre, Pa.; Cleveland, Ohio; Joliet, Ill.; Des Moines, Iowa; Omaha, Neb.; Cheyenne, Wyo., and Salt Lake City, Utah, and in other latitudes will be slightly inaccurate according to distance north or south of this parallel. Such inaccuracy, however, exists in all almanacs, and is of slight importance within the territory in which the almanac is usually distributed.

In this almanac the calculations are given according to the apparent motion of the real sun; in other words, according to solar time. Consequently, the data given is applicable alike to Eastern, Central and Western states, excepting the moon's changes, for which the time is given separately at the bottom of the calendar pages.

The Year 1912

The year 1912 is a leap year, and the year of a presidential campaign and election. It comprises the latter part of the 136th and the beginning of the 137th year of American Independence.

The year 5673 of the Jewish era begins at sunset on September 11th, 1912.

The year 1330 of the Mohammedan era begins on December 11th, 1912.

January 1st, 1912, is the 2,419,403d day since the beginning of the Julian Period.

Do We Mean What We Print?

It is with some little frequency that we receive letters inquiring, sometimes in a direct but more often in an indirect way, as to the sincerity and dependability of statements made in our advertising matter. The following is from the text of a letter that reached us as we were about to begin preparation of our almanac for 1912, and it may be taken as an example of the more frank and direct inquiries of this kind:

"I have been reading your Veterinary Adviser and it all sounds very well, but I have a horse for which something must be done, and I want to ask you frankly as man to man, do you mean it or is it just advertising?"

These doubting letters do not form any considerable part of our correspondence, but they are sufficient in number to suggest that thousands of others may hold a similar mental attitude without taking the trouble to write to us about it.

Answering the above question in the same straightforward manner in which it is asked, we would say that, whether printed, written or spoken, any statement we make concerning the goods we offer is what we believe to be true and amply justified.

Advertising, according to our conception, is merely a means of speaking to large numbers of people and at a distance, instead of to a few personally and face to face. As to the sincerity of what is said, there is neither reason nor excuse for any difference whatever. Nor does the fact that numbers are being spoken to eliminate the personal quality that is recognized in a letter, or even in a verbal conversation. To you reading this, we are speaking as though personally, and in the same personal way we tell the same things to several hundred thousand others who read other copies of the same book.

Nothing is more essential to successful business than the confidence of the buying public, and such confidence can be acquired and maintained only by offering goods that are worthy and making truthful representations concerning them. A reverse policy might make some little show of success for a time, but inevitable failure would lie not far ahead, and if we were asked to name a sure road to failure we could do no better than to say:— Advertise your goods in a manner not justified by their actual merit, so that those who purchase will be disappointed, and their confidence in you destroyed.

Our advertising, therefore, is meant to be as exactly representative of our goods as we are able to make it. It is our means of telling what Fleming's Remedies are for and what they may reasonably be expected to do—our means of giving such information as a prospective customer, for his own good as well

Fleming's Lump Jaw Cure

This is the only remedy for Lump Jaw that has ever become widely known or attained a large sale. Its success as a cure has made it a success in a business way, while most of its dozen or more competitors have disappeared entirely.

Lump Jaw is given considerable space in Fleming's Vest-Pocket Veterinary Adviser, and we refer you to that book for information concerning the disease. Will say here, however, that the term Lump Jaw does not refer to indiscriminate bunches that may appear about the jaws of an animal, but to a specific germ disease, technically known as Actinomyces. It is common among cattle only, and rarely, if ever, affects horses. Do not order this remedy with a view to treating a bunch upon the jaw of a horse, because there is only the remotest possibility that such a case is Lump Jaw.

Read the testimonials, and if you have a case to treat, do not hesitate to order. We guarantee a cure or your money back.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Cured 21 Out of 22.

Gentlemen:—Will you please send me a copy of your Vest-Pocket Veterinary Adviser? Have used your remedies with good success. With your Lump Jaw Cure I have cured twenty-one cases of Lump Jaw in the last two years. Have had only one failure and that case was of two years' standing when I began the treatment.—I. W. Hurst, Kelvin, N. D., Box 43.

Used It Ten Years.

Dear Sirs:—About ten years ago I purchased a bottle of your Lump Jaw Cure and used it with good success. Since then I have used several bottles. Think that the bottle from which I am using now is the fourth. I usually keep a good many cattle and have one to three cases of Lump Jaw every year. Your remedy has cured every case that I have treated and some of them have been bad ones.—J. S. Treece, Sweet Springs, Mo.

Two Methods Tested.

Gentlemen:—I want to tell you that the Lump Jaw Cure that I sent to you for last fall has cured my steer of Lump Jaw. I had two cases and I had a veterinarian to doctor one of them. He failed and I sold the steer for fifteen dollars and was glad to get that much. A friend advised me to use your Lump Jaw Cure on the other one. The result was a cure, and he is ready for the market and will bring \$80.00. Please send me your Vest-Pocket Veterinary Adviser.—Thomas Baird, Cantril, Ia.

Thought Two Would Die.

Gentlemen:—I bought a bottle of your Lump Jaw Cure, cured four head of cattle with it and had some left. Two of them were bad and I thought they would die before I began using your cure. Please send me a bottle of your Spavin and Ringbone Paste for the two dollars enclosed.—Flavel H. Cartsell, New Philadelphia, Ohio, Star Route.

One Bottle Cured Two.

Gentlemen:—Enclosed find money order for two dollars, for which please send a bottle of your Lump Jaw Cure to Mr. Simon Williams, Ollie, Ia. I got a bottle of this remedy four years ago, used it on two head of cattle and cured them both. I had some left, which I gave to Mr. Williams, but it was not quite enough to effect a cure on the steer he is treating. Please send it at once.—F. H. Heilman, Richland, Ia., Route 4.

Saved \$30.

Gentlemen:—I bought a bottle of your Lump Jaw Cure that saved me \$30 and I used only a third of it. I was offered \$10 for the steer before I used the remedy, but when I had cured him I sold him for \$40.—C. S. Hawhee, New Market, Ia.

One Bottle Cured Four.

Gentlemen:—I still have a part of a bottle of your Lump Jaw Cure that I ordered several years ago. This remedy is the only cure for Lump Jaw that I have ever found. I had a bad case that I had used other remedies on, with no success. With one application of your remedy it was entirely cured in thirty days, and I have cured three others with the same bottle and it is not more than half gone. I would not take ten dollars for what I still have, if I could not get another bottle.—Burnard Minor, Waxpool, Va.

Cheap Medicine.

Gentlemen:—Enclosed find two dollars, for which send me one bottle of your Lump Jaw Cure. I cured eight bunches with the other bottle. It is the cheapest medicine I ever bought. Please hurry this order.—C. L. Lord, Rantoul, Kansas.

Plenty Left for Further Use.

Gentlemen:—Two years ago this spring we had a valuable cow that had Lump Jaw. I got a bottle of your Lump Jaw Cure and cured her sound and well by applying three times. This spring one of my neighbors had a cow with this disease. I tried it on her and cured her completely. I have two-thirds of the bottle left.—J. A. Kinnison, Wellston, Ohio.

To avoid possible misunderstanding, we wish to insert a little note at this place. Several of the foregoing testimonials speak of curing cases by using only a very small part of a bottle, but we do not wish you to understand that you can always get a cure so easily. Most cases are cured with considerably less than a bottle, but some will require an entire bottle, and a few may need even more than that. A good deal depends upon the manner in which the remedy is used, some being more wasteful with it than others. It is not necessary to apply freely, as you will understand by reading the directions. We do not supply less than regular sized bottles, but if you have some left it will be a valuable thing to have on hand, as other cases may develop in your own or in a neighbor's herd at any time.

A Great Remedy.

Gentlemen:—Will ask you to kindly send me a copy of Fleming's Vest-Pocket Veterinary Adviser. I have used your Lump Jaw Cure with success on eight or nine cases. It is a great remedy.—Richard H. Clemmer, Middlebrook, Va.

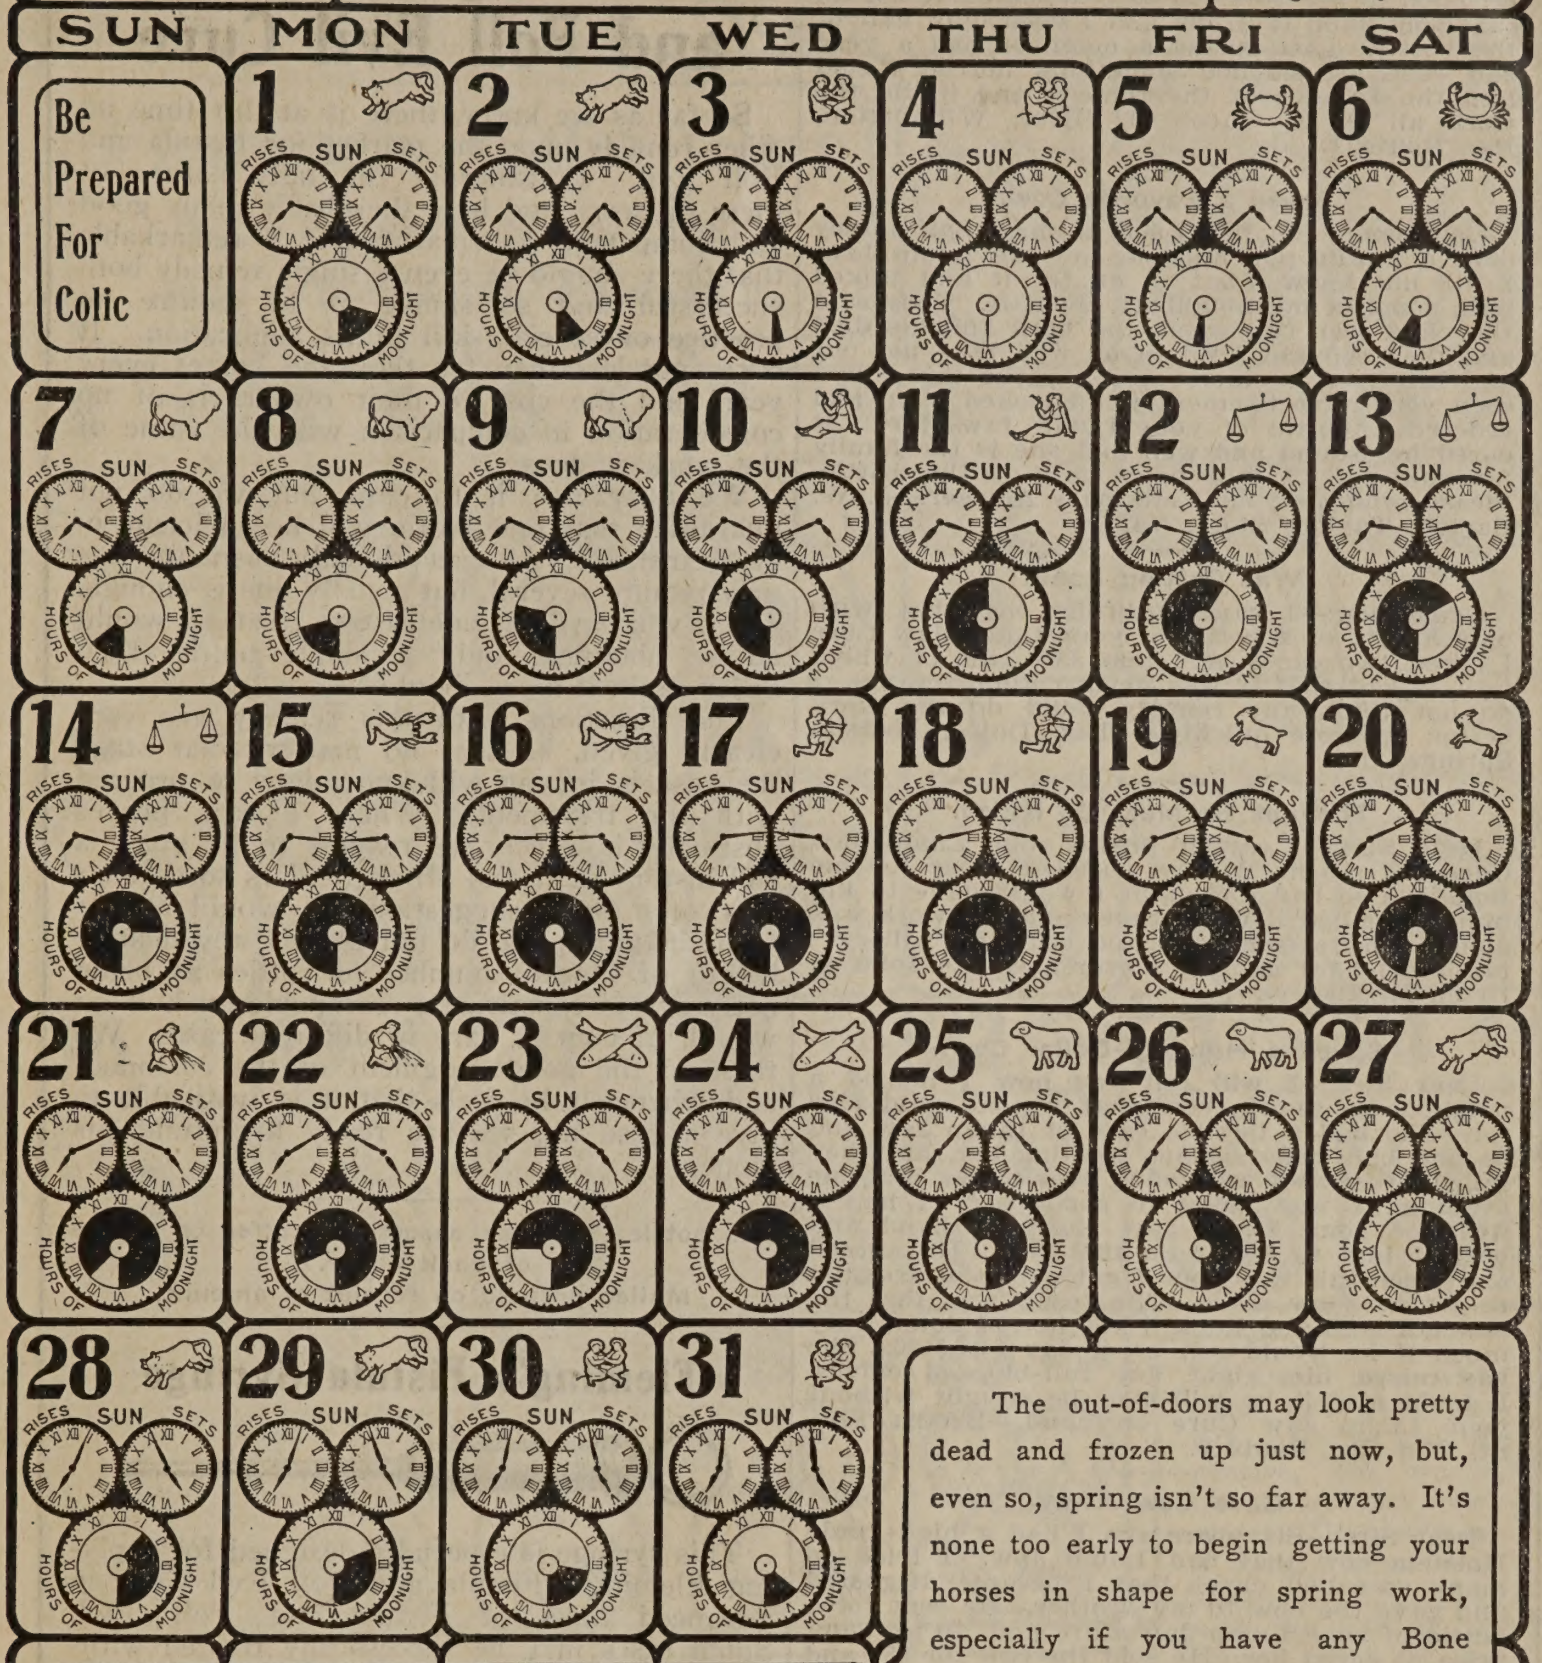

Nothing Else Will Do.

Dear Sirs:—I am out of Lump Jaw Cure and send herewith two dollars for another bottle. It surely is a medicine that cannot be replaced by anything else. I have a few cases to treat and would ask you to please fill my order promptly.—Fred Crewing, Henry, S. D.

The out-of-doors may look pretty dead and frozen up just now, but, even so, spring isn't so far away. It's none too early to begin getting your horses in shape for spring work, especially if you have any Bone Spavins, Ringbones or Fistulas to

cure. Time is a necessary factor in such cases. You can't effect a cure within a week or two, and, especially with Fistula or Poll Evil, nobody can say just how much time will be needed. Usually it takes a month or six weeks to treat Bone Spavin properly with Fleming's Spavin and Ringbone Paste, but its better to have more time than is needed than not enough.

Smelled Fierce.

Gentlemen:—Three or four years ago I had occasion to use your Lump Jaw Cure. It did all that you claim it to do, and I used only half of the bottle. Last spring a neighbor had a very bad case. It smelled something fierce. I sold him the balance of the remedy and it did the work all O. K.—Jacob H. Byler, Wilmington, Pa., Route 1.

Saved a Favorite Cow.

Gentlemen:—In 1907 I had a small half-Jersey cow, a family pet, and she got the Lump Jaw. I did not know what to do for it and talked with some of my neighbors about it. They said they had seen two cases and both animals died and they thought I might as well take her out and kill her. I remembered a paper that I had seen your advertisement in. I looked it up and ordered a bottle of your Lump Jaw Cure. It cured her sound and well and she is the family favorite yet. I still have half of the bottle. Please send me your Veterinary Adviser.—J. W. Barton, Taylors Store, Va.

Was Getting Rank.

Gentlemen:—I can truthfully say that with only a part of a bottle of your Lump Jaw Cure I cured two cases of Lump Jaw, one of which was so bad that it was getting almost rank. I do not think any remedy could do the work better or more quickly.—Chas. Doyle, Medical Springs, Ore.

Thought He Must Be Killed.

Dear Sirs:—I cannot praise your Lump Jaw Cure too much. It has cured a steer for me that was so bad I thought I would have to kill him. I applied it three times and the work was done. I have some on hand still and will certainly send for more if I ever need it.—John A. Urtel, Medina, N. Y.

Saved a Hundred-Dollar Cow.

Dear Sirs:—I will tell you how I helped a neighbor to save a cow that he had paid \$100 for. She had a terrible case of Lump Jaw and he had had veterinarians treating her, but they failed. Just as I was going over to see him one evening he was going to shoot her. I had a little of your Lump Jaw Cure on hand and begged him to try it on this cow. He agreed and when this was gone I got our local druggist to get us some more. The result was that the cow got well and he still has her. I doubt very much if he would sell her today for \$100. She has raised him eight fine full-blooded calves. I doubt also if he will ever be caught without your Lump Jaw Cure on hand.—Bertha Fox, St. Olaf, Ia., Route 2.

Gave Cow Away.

Dear Sirs:—Six years ago I had a high-grade Holstein cow that had Lump Jaw. I tried so many so-called cures that I became disgusted and gave the cow to my brother. He sent for a bottle of your Lump Jaw Cure and, to my surprise, it cured her. He sold the cow for \$50 and since that time I have kept your remedy on hand regularly. If you can make use of this you are at liberty to do so.—Moses Fuhr, Prop. Wapsie Valley Holsteins, Fairbank, Ia.

(Continued from page 3.)

is taken into account. Wheat, from the time it is threshed, will shrink two quarts to the bushel or six per cent in six months, in the most favorable circumstances. Hence, it follows that ninety-four cents a bushel for wheat when first threshed in August, is as good, taking into account the shrinkage alone, as one dollar in the following February.

Corn shrinks much more from the time it is first husked. One hundred bushels of ears, as they come from the field in November, will be reduced to not far from eighty. So that forty cents a bushel for corn in the ear, as it comes from the field, is as good as fifty in March.

Fleming's Fistula and Poll Evil Cure

So far as we know, there is at this time no other remedy upon the market for Fistula and Poll Evil. Considering the ugly nature of these diseases, and how they baffle many good and competent veterinarians, it is remarkable that there should be even a single remedy both successful and so simple as to require no practice or special skill in its application. It cures not less than ten thousand horses every year, and the cost to their owners is of no consideration in comparison with the value of the work it does.

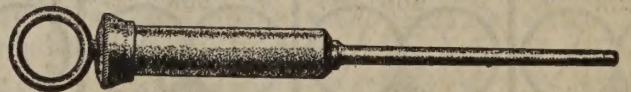

We guarantee it to cure, but we do not guarantee that one bottle will be sufficient in every instance. An exceptionally obstinate case may require several, but usually one is enough, and if you have but one case to treat, we would advise obtaining only a single bottle, then order again if more should be needed.

The directions with this remedy are very clearly given, so that no matter what stage the case is in you will know how to proceed with the treatment. Where a case proves obstinate, however, we request to be given a full history of it and all particulars so that we may offer such suggestions as would appear to be helpful. We do not specify any definite length of time or number of bottles as being necessary to constitute a reasonable trial. That would, of course, vary in different cases. We trust to the good judgment of the customer, and whenever he feels that it is justifiable to give a case up, we are ready to refund his money.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Fleming's Fistula Syringe

This syringe is especially designed for applying Fleming's Fistula and Poll Evil Cure in advanced cases of Fistula and Poll Evil. Some cases may be successfully treated without it, but the work is easier done and results are apt to be more prompt when it is used, and a common short-nosed syringe is usually worse than useless. These syringes are made to order for us, and the pipe or nozzle is three inches in length, so that it will reach well down into the openings. The pipes are detachable, and extra ones can be supplied in case of breakage.

Complete Syringe, by mail, 50 cents.

Extra Nozzles, each - 20 cents.

Made \$97.

Gentlemen:—I used your Fistula and Poll Evil Cure on a mule that was almost worthless. I

Once in a while
some one says that
our remedies are ex-
pensive, but we do
not hear that very
often. Those who say
it usually do so when
comparing the price
with the size of the
bottle. Most of our

bottles are small, we will admit, but it isn't its size that counts, and you don't buy medicines in order to get bottles. Results are what you want. A bottle of Fleming's Spavin and Ringbone Paste isn't much bigger than a walnut, but it's better value for the money than a barrel of something that doesn't cure. Small as it is, we have known of thirteen ringbones being cured with one package. There are other spavin preparations for which as much as five dollars is asked. At that rate, it would seem that we should be getting twenty-five to fifty dollars for ours.

gave \$30 for it, used one bottle of the remedy, cured her, and sold her for \$127. Your medicine is all right.—B. R. Heathman, Armstrong, Mo.

One Bottle Cured Three.

Gentlemen:—I will tell you what your Fistula and Poll Evil Cure has done for me. It cured my mare of the worst kind of a poll evil two years ago, and also two horses for neighbors of mine were cured out of the same bottle. They were Mr. Howard Drake and Eli Guess.—Ross Allen, Carrollton, Ohio, Route 3.

Required Three Bottles.

Dear Sirs:—You may remember my sending to you a few years ago for your Fistula remedy. Well, it cured that young black Percheron horse and left no scar on him. I sent for the fourth bottle, but used only three. The bottle I had left cured one of my neighbor's horses of a Fistula by using only half of it.—G. W. Cox, Loveland, Ohio, Route 1.

Spent Nearly \$100.

Gentlemen:—I own a horse that had nearly \$100 spent on him with different veterinarians for a case of Poll Evil before I heard of your remedy. I sent for a bottle of your Fistula and Poll Evil Cure and used it with entire success. The other day I met an Armenian dry goods peddler on the road and his horse, a fine young animal, had a bad case of Poll Evil. I stopped him and talked with him about it, and he told me he had spent \$75 doctoring him. I told him about your medicine and gave him your address. Today he hunted me up and wanted me to send for some for him, so I am enclosing two dollars and a half for one bottle of Fistula and Poll Evil Cure and one Syringe. That medicine is certainly great stuff.—F. H. Pearson, Stratham, N. H.

Had Eleven Openings.

Gentlemen:—Last year I ordered three bottles of your Fistula and Poll Evil Cure in an effort to cure one of the worst cases of Fistula ever known in this part of the country. When I began using your remedy there were eleven places where pus or matter was escaping freely. It required all of the three bottles, but the animal is now as sound and well as any horse in the country. There is not any question about it; your remedy properly applied will cure any case in existence. You may use this as you please.—J. F. McGowan, Guin, Ala.

All Pronounced It Incurable.

Dear Sirs:—Several years ago I sent to you for some of your Fistula and Poll Evil Cure. I had a horse with one of the worst cases of Fistula I ever saw. It had been pronounced incurable by all the horse doctors and veterinarians around here. I tried everything recommended to me, but nothing did any good. After using about half the medicine you sent me, the horse was completely cured and the Fistula never came back. I never can say enough for your medicine and the good it did this horse.—E. A. Phillips, Madison, Mo., Route 5, Box 97.

Had Spent Nearly \$60.

Dear Sirs:—I wrote to you some time ago and told you that the Fistula Cure I was using wasn't doing any good and you said I was not getting the medicine deep enough down into the openings. I did as you told me, and two applications cured. It was a case of Fistula of one year's standing. Two veterinarians had worked on it and had charged me nearly \$60. I want to say that your Fistula and Poll Evil Cure is great. It just beats anything I ever saw. Your Colic Cure is also just marvelous.—Arthur J. Tuffy, Grand Junction, Colo., Route 4.

Worth Its Weight in Gold.

Gentlemen:—You remember I sent to you for a bottle of your Fistula Cure. Well, it cured my mare sound and well. I had about decided

she could never be cured and every one that saw her said they would not have her if I would give her to them. I used only about one-third of the bottle and gave the rest to a neighbor who had a case of Fistula, and it cured it, so there were two cases cured with one bottle, and there is still a little of the medicine on hand. Gentlemen, it is far ahead of any remedy I ever saw, and worth its weight in gold.—C. O. W. McClain, Dukedom, Tenn., Route 3.

Was Little Leary.

Dear Sirs:—I wrote you last winter about two horses that had Fistula. At that time I was a little leary about your medicine, but both horses are sound and well today. You can't tell by looking at them that they ever had Fistula. Did not use quite two bottles. I think it is just all right.—E. T. Cook, Three Forks, Mont.

Large Holes.

Gentlemen:—I take pleasure in thanking you for the work your Fistula and Poll Evil Cure has done, and I think that it is the only thing. My horse had the worst kind of a Fistula. A veterinarian worked on her for three months, leaving her with a hole on each side of the withers large enough to lay your fist in. After using one bottle she was completely cured, and I shall hereafter take pleasure in recommending your remedy.—Orrin Harris, Cattaraugus, N. Y.

Believes It Will Cure Any Case.

Dear Sirs:—I have a mighty fine young Belgium draft mare that I would not take \$300 for. I bought her at an awful price, and when I had had her about two months I discovered that she had Fistula. I called a veterinarian and he cut it open. I then treated it day after day according to his instructions, but it kept getting worse. We cut and cut until we had seven holes cut in her neck, then blood poisoning set in. She swelled almost as tight as the skin would hold, and the swelling went clear down to her knees. A little later I got a copy of your Veterinary Adviser and read it carefully. I decided that I would try your remedy. The result is that I have worked this mare since last seeding, and there is no sign whatever of the disease. My opinion is that it will cure the worst case of Fistula that ever was. I believe that with it I could cure every case. I never saw such an effective remedy for anything. I used one bottle and about one-third out of another. The doctor said it was the worst case he ever had. Will also say that I cured two cases of Colic with your Colic Cure. Please accept my thanks.—A. S. Claar, Creston, Ohio, Route 1.

A Woman Can Use It.

Dear Sirs:—It is certainly with pleasure that I write you in regard to the Fistula and Poll Evil Cure. It is marvelous, the cure it effected on my mare. It was the worst thing I ever saw. I took the mare to Dr., who is a celebrated veterinarian, and he told me that if I would give her to him he would not take her. He told me to take her home and take her to the woods and shoot her. Today she is well and not a trace or sign of a scar. One bottle of your Fistula and Poll Evil Cure did it, and as no one would help me, I did the work myself.—Mrs. Sarah E. McWilliams, Mansfield, Ohio, Route 7.

We consider this testimonial worthy of a little special comment. Elsewhere we have spoken of the ease and simplicity with which our Fistula and Poll Evil Cure is used, and this letter serves well to emphasize that point. Think of a woman undertaking a bad case of about the ugliest disease that a horse can have, one that a skilled veterinarian had refused to have anything to do with, and carrying it to a successful conclusion, thus saving her horse in spite of the refusal of others to give her help. We ask you to read all of these Fistula and

A million bottles a year—that is about what the demand for Fleming's Colic Cure ought to be. It is good enough to deserve such a sale, and would have such a sale if all horse owners knew its value, realized the danger of Colic, and were disposed to prepare for it in advance. Don't let colic catch you unprepared—order now.

If any of your horses are in bad order this spring, just try Fleming's Tonic Heave Remedy instead of ordinary condition powders. Give one dose each evening for ten days or so, then a dose every other day for a time, and watch the result. The good it does is lasting, and numbers have told us that by giving it in the spring, their horses keep in better condition and have better endurance all summer long. If you do not find it a good investment, ask for your money back.

Poll Evil letters. We believe you will admit that they are the most remarkable lot of testimonials that you ever saw in print. And as you read them, remember that this good work is going on throughout the entire country, and that to receive letters like these is an every-day experience of ours. Think, too, of the vast aggregate saving afforded the owners of horses that would otherwise be lost. The amount we receive from the sale of the remedy is microscopically small in comparison.

The Right Thing at Last.

Dear Sirs:—I have a young mare that had a Fistula come on both sides. I had the V. D. S. operate on her, then I tended her about two months and he operated again. I tended her two months more, then had a doctor from Lewiston operate, after which I took care of her for two months again. I then got your Fistula and Poll Evil Cure and in thirty days she was well. She has no scar left.—H. S. Hastings, Newry, Maine.

Was Just Rotten.

Dear Sirs:—You remember I sent to you for your Fistula and Poll Evil Cure last fall. I got it and went according to directions and cured my mare just as sound as a dollar. She was just rotten on both sides. She had been treated and operated on by a skilled veterinary for three months before I commenced your treatment. I feel very grateful for the work your remedy has done.—T. L. McMilliams, Girard, Kans., Route 3.

Three Failed.

Gentlemen:—Two years ago we had a white horse that had Fistula and was doctored by three different veterinarians. I concluded to stop before their bills amounted to more than the horse was worth. He was so bad that the matter would run down to his feet, and it was on both sides. After four applications of your Fistula Cure he was well, and in four months we sold him for \$110.—H. W. Moore, Woodbury, N. J., Box 207.

Thought Him Down and Out.

Gentlemen:—Thanks to you for your Fistula and Poll Evil Cure. My mule is well and will go on any market as soon as the hair comes out a little better. Had tried two veterinarians and he only got worse. Didn't quite use one bottle. This is a five-year-old mule, sixteen hands high and will weigh 1,200 pounds. You know how thankful I am for saving him, for I considered him down and out.—J. P. McCloskey, Edina, Mo.

Had Several Operations.

Dear Sirs:—I once used your Fistula and Poll Evil Cure on a horse that had been operated on for Fistula several times, and had been given up as incurable. I cured him up with it. That was six years ago and he is still all right.—W. H. Tutor, Woodward, Ia., Route 1.

Both Made a Failure.

Gentlemen:—I have cured a bad case of Poll Evil with your Fistula and Poll Evil Cure. Had tried two veterinarians, both making a failure. The first man did not accomplish anything but to leave a scar that is about as large as my hand where the hair does not grow. Aside from the hair not growing it is perfectly natural. Do you know of anything that will cause the hair to grow out? She is one of a well-mated team of blacks that are five years old and weigh about 1,700 pounds apiece.—C. G. Goodwin, Payette, Idaho.

Considered Worthless.

Gentlemen:—In October 1909 I purchased one bottle of your Fistula and Poll Evil Cure, having a horse that had a Fistula for over a year. He was considered by local horsemen to be absolutely worthless. I used about half of the one

bottle, making five applications, and the result was that the horse has worked on the farm since a year ago last March with absolutely no sign of Fistula.—M. C. Bresee, Fair Haven, Vt.

Pus Ran to Hoofs.

Dear Sirs:—I will write you now concerning two bottles of Fistula Cure which I bought from you about a year and a half ago. I first bought one bottle and used it according to directions, all but enough for one more application. I then wrote and told you that I believed it would not cure my mare, and was ready to quit. You answered my letter and told me that if I wanted my two dollars you would send it to me, but you advised me not to give it up so soon. I finished the first bottle, then ordered the second, and by the time I received it my mare was healed. It was a bad case of Fistula and the pus ran clear down to her hoofs. I never opened the second bottle until three months afterwards, when one of my neighbors had a horse that had Fistula. I used about one-third of the second bottle on him and it cured him.—Geo. L. Christman, Lewisville, Ohio, Route 1.

Doctor Offered \$5.

Dear Sirs:—I have a horse that had the Poll Evil, and I had a veterinary trying to cure him. One time when I was down with him he offered me \$5 for the horse. I had him under his care for a long time, but no result followed. While out riding one day I met a friend who told me about your Fistula and Poll Evil Cure. I ordered three bottles and began to use it. It was a tedious case and I used up the three and ordered two more. When I had used only a little of the fourth bottle, he was cured. I consider him worth about \$200 today.—Gust M. Goranson, Randolph, Kansas.

Advised to Shoot Him.

Dear Sirs:—I have neglected writing to you in regard to the horse that I doctored with your Fistula Cure. The horse was twenty-five years old and I had tried every known remedy; also two veterinarians doctored him with no success. They told me I had better shoot him, but I felt as though I wanted to save him as he was the only horse I had that could be driven by my children, and they drive him to school every day. It had been running one year. I sent for a bottle of your medicine through advice of one of my neighbors. The first bottle did not entirely cure it, so I sent for another and used about one-third of it, and he was cured. I sold the remainder of the bottle for \$1.50 to a man who cured another horse.—Willis J. Bartholomew, Fair Haven, Vt., Route 1.

Bottle Cured Four.

Gentlemen:—I feel it my duty to inform you what your Fistula and Poll Evil Cure has done for me. It has saved me at least \$200. I bought one two-dollar bottle and have cured four Fistulas with it. It is O. K.—Myron Morse, Jenison, Michigan, Route 1.

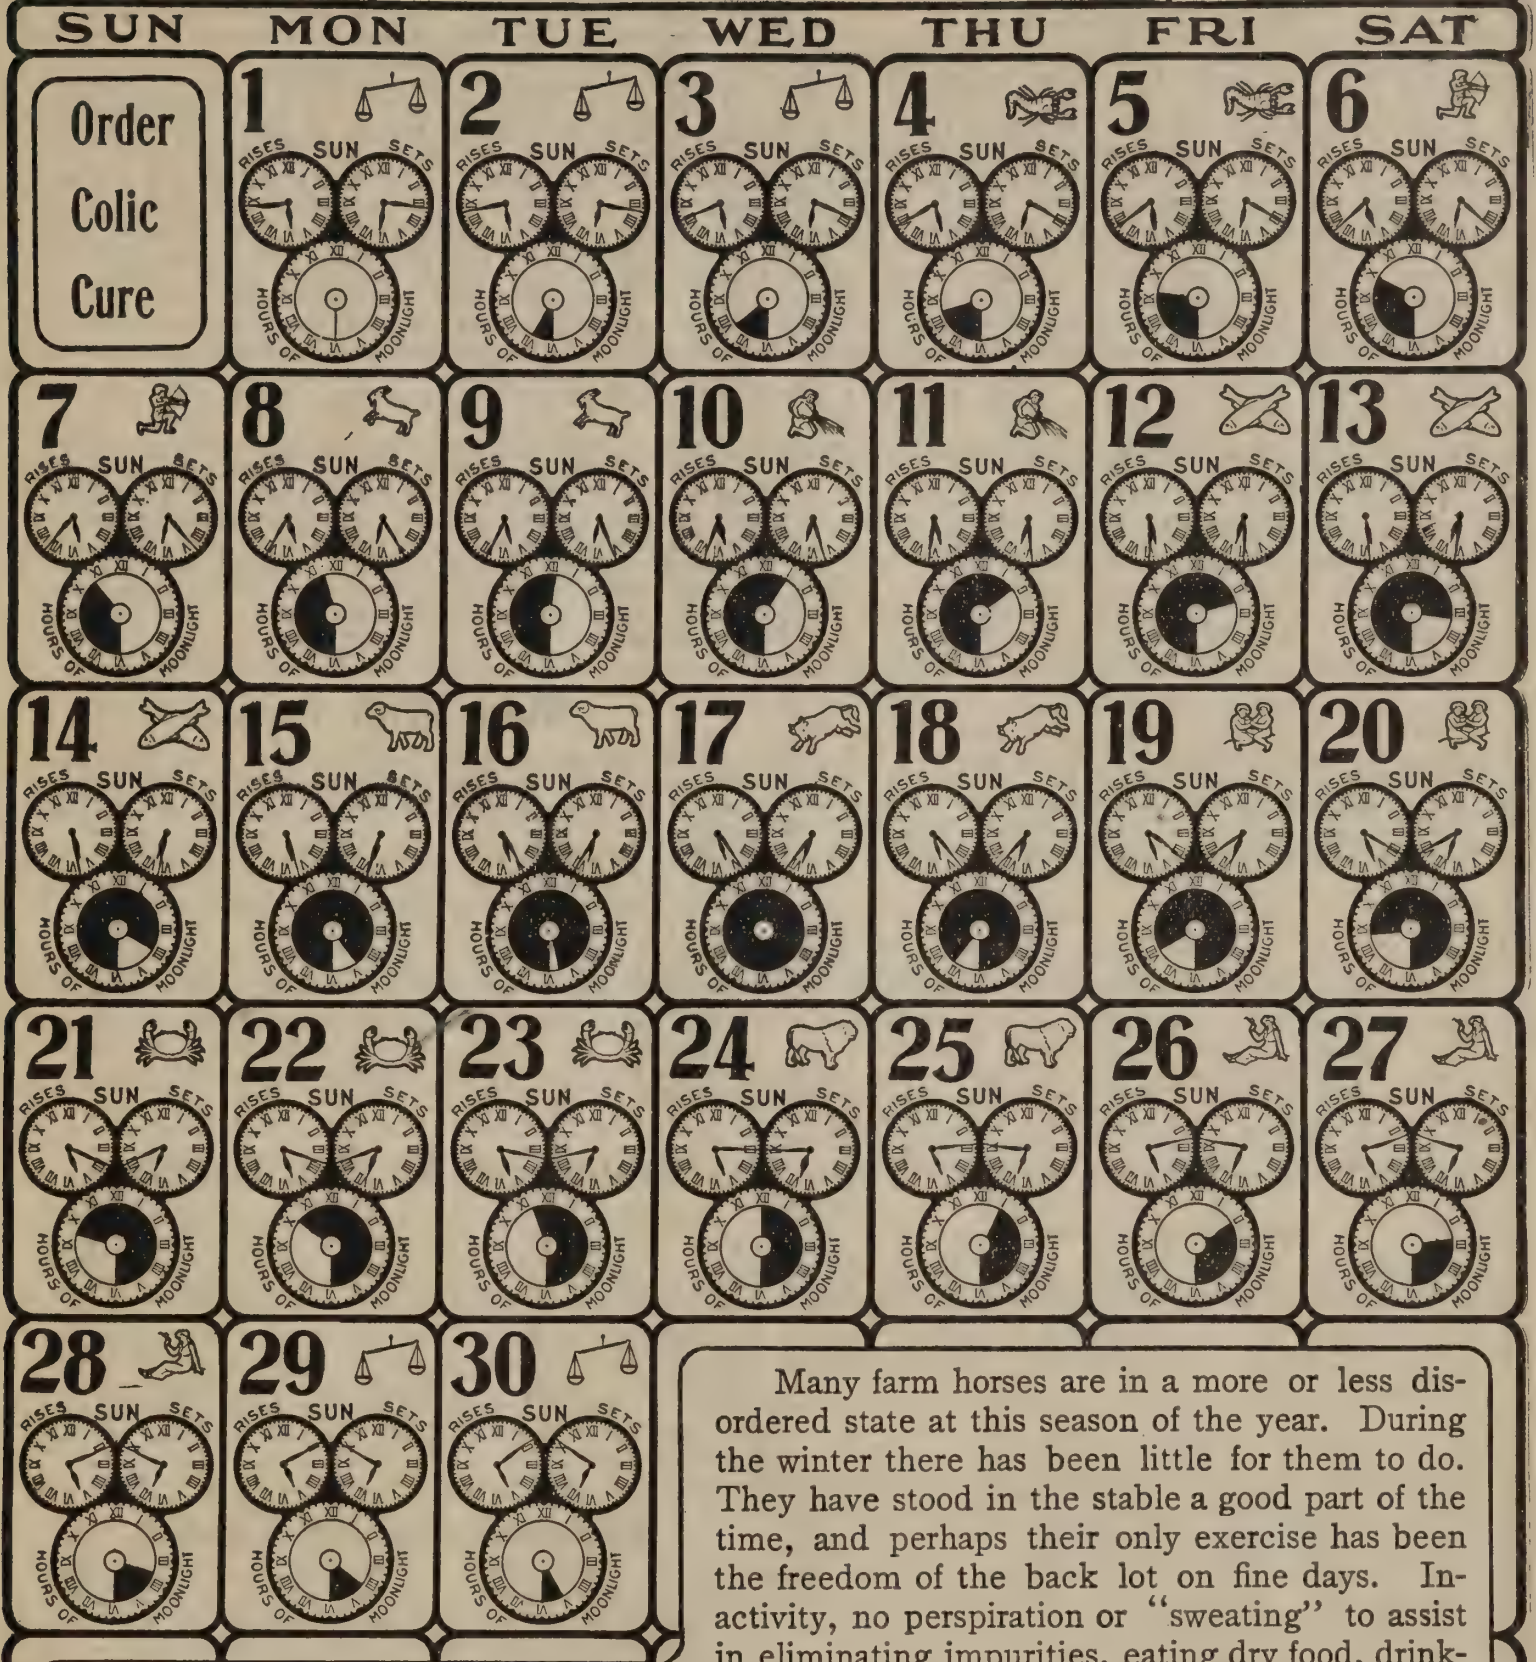

Will Cure if Anything Can.

Dear Sirs:—I feel that I owe you a word about a horse that I cured with your Fistula and Poll Evil Cure. About a year ago or more I had a very bad case of Fistula and tried everything that I could think of or hear of; then a friend handed me about one-third of a bottle of your Fistula Cure. When I had used it my horse was nearly cured, so I sent for another bottle which finished curing the animal, and I still have enough left for another case. During the worst stage of this case I could place my hand over the back of the horse, back of the withers, and the corruption would squirt out of the openings in front of the withers on the neck. There was a pipe on each side of the withers which this remedy had to get at, and it did get at them in some way as the horse is as sound as ever. I recommend your remedy to all, as I

Many farm horses are in a more or less dis-ordered state at this season of the year. During the winter there has been little for them to do. They have stood in the stable a good part of the time, and perhaps their only exercise has been the freedom of the back lot on fine days. In-activity, no perspiration or "sweating" to assist in eliminating impurities, eating dry food, drink-

ing ice cold water, etc., have impaired digestion and lowered the tone of the whole system. Give some variety of food, and let bran make up a part of the grain ration for a time. Let them have some grass as early as it is to be had. Some of them may need a tonic. Fleming's Tonic Heave Remedy is an excellent general tonic and blood purifier for horses. It will build them up and make them look good and feel good. We know of no better remedy to put a horse in shape for spring work. Your money back if not satisfied.

know that if it will not cure nothing will.—G. B. Smith, Lower Lake, California.

Surely Worth its Cost.

Dear Sirs:—I must tell you of the great success I had with your Fistula and Poll Evil Cure. I cured a three-year old colt of Fistula of the withers. I tried to sell the colt for \$50 and could not. Cured her with three applications and sold her for \$125. Then a man came along and called at my place and he had a nice five-year old horse that had a Poll Evil. He had had it treated by veterinarians who told him that it could not be cured. I told him about your remedy and let him take the medicine and the syringe, and he cured him. It was running at three places. The man places the value of the cure at \$125. I have made this quite lengthy, but these are true facts which I can prove by several reliable parties. I have about one-third of the bottle left.—Greeley Downs, Mooers, N. Y.

Wanted to Shoot Him.

Dear Sirs:—I have used your Fistula and Poll Evil Cure on three horses and found it satisfactory in every respect. The medicine was used two years ago and two of the horses are yet at work. The other one got well of the Poll Evil, but died with Colic. One of the horses was so bad that the best veterinarian in Charlottesville wanted to shoot him. Your Spavin and Ringbone Paste I have never used, but I advised my neighbor, J. R. Adams, to use it on his horse which was twenty-two years old. He did so and now you cannot see that he limps at all.—W. J. Harvey, Birdwood, Va.

Not Worth Anything.

Gentlemen:—I cured a mare with Fistula three years ago that was not worth anything, and now she is sound and well, and I would not take \$200 for her. I cured her with one bottle of your Fistula and Poll Evil Cure. I also cured a mare belonging to Rose Ladley. It was broke in five places and was the worst case I ever saw. I have recommended your remedy to others in this neighborhood that have done the same with it.—Arthur Stratton, Hettick, Ill.

Couldn't Give Him Away.

Gentlemen:—Your Fistula and Poll Evil Cure worked wonders on my saddle and driving horse. Cured him after all else had failed, and I had tried to give him away and could not. Now he can't be gotten.—W. M. Feltner, Crafton, West Virginia.

Had It Two Years.

Dear Sirs:—I feel it my duty to write you and let you know that I cured the horse that had the Poll Evil for two years. Every one that looked at it would tell me that it could not be cured, but it is entirely well and I work him every day. I cannot praise your treatment enough.—G. B. McCuin, Brooksville, Miss., Route 2.

A Wonderful Remedy.

Dear Sirs:—Some time ago we had a valuable driving mare with a very bad Fistula and we purchased your Fistula remedy, which cured her completely. Certainly it is a wonderful remedy. We also purchased five dollars' worth of your Tonic Heave Remedy, and let me add that it is the best on the market, in my opinion.—Atwood Bros., Waterbury Conn.

Didn't Get the Chance.

Dear Sirs:—I had good success with your Fistula and Poll Evil Cure. The Poll Evil has been well for a year or more and the part is as smooth as can be. A veterinarian here told me that when I got tired trying to cure this case, he would buy the horse, but he didn't get the chance.—S. F. Pearson, Otis, Kansas.

Government Whitewash

Slake half a bushel of unslaked lime with boiling water, cover during the process to keep in steam, strain the liquid through a fine sieve or strainer, and add to it a peck of salt, previously dissolved in warm water, three pounds of ground rice boiled to a thin paste and stirred in while hot, half a pound of Spanish whiting, and one pound of clear glue, previously dissolved by soaking in cold water and then hanging over a slow fire in a small pot hung in a larger one filled with water. Add five gallons of hot water to the mixture, stir well, and let it stand a few days, covered from dirt. It should be applied hot, for which purpose it can be kept in a kettle or portable furnace. It is used by the government for whitewashing light-houses. A pint of this wash mixture, if properly applied, will cover one square yard, and will be almost as serviceable as paint for wood, brick, or stone, and is much cheaper than the cheapest paint. Coloring matter may be added as desired. For cream color add yellow ochre; pearl or lead, add lampblack or ivory-black; fawn, add proportionately four pounds of umber to one pound of Indian red and one pound of common lampblack; common stone color, add proportionately four pounds raw umber to two pounds lampblack.

Skim Milk Paint

This formula was published in our 1909 almanac, since which we have received so many requests for it that we give it again in this number.

Into one gallon of sweet skim milk stir three or four pounds of the best Portland cement. Add Venetian red or other dry pigment sufficient to bring it to the desired color. Mix only a gallon at a time, as it is not good after standing too long. The mixture must be kept well stirred, as the cement tends to settle to the bottom. This paint looks well and its durability is surprising. It is an excellent paint for sheds, barns, poultry houses, fences, etc., and the cost is next to nothing.

Grains for Poultry Feeding

Rye is the poorest of poultry grains. Corn and buckwheat should be fed sparingly, as they are very fattening. Wheat leads as a well balanced food, and barley is a close second. Feeding too much buckwheat has a tendency to produce a white skin and light colored yolks in eggs. Millet seed is an excellent egg-producing grain. Beans being highly nitrogenous are equally beneficial. Sorghum and broom corn seeds will do to add variety to the bill of fare.

Inexpensive Fly Chaser

Take two cakes of common laundry soap and dissolve in warm water. To this add 1½ pounds resin, ½ pint of fish oil and enough water to make three gallons in all. The resin is of course to be pulverized before it is added to the mixture. When ready to use add ½ pint of kerosene and put on the cows with a brush or spray pump, using about ½ pint to each cow. Three times a week should be often enough to apply, and when the hair is coated with the resin it will not be necessary to apply so often.

A Gardening Hint

The horticulturists of the Minnesota experiment station suggest the planting of radish seeds along with slowly germinating seeds, such as parsnips, onions, etc. The radishes quickly afford a line of green by which to guide the cultivator; thus enabling the cultivation of the slower crop to begin before its leaves appear—something which will "count" in the size and quality of the crop. The radishes will be out of the way before their room is needed.

Perhaps about now a Spavin or Ring-bone is becoming a more serious matter than you thought it would be, so that the horse will not be able to do his part of the season's work. Too bad he was not treated before work began. Let him rest if you decide to treat him now.

Don't
Neglect
Lump
Jaw

Along in the fall we begin to notice an increase in the orders for Lump Jaw Cure, and quite a few mention that the case came on in the spring or summer, but hasn't had attention owing to other work. We know that most farmers have plenty to do at this time of the year, but it doesn't pay to risk losing an animal by neglecting Lump Jaw, and besides, Fleming's Lump Jaw Cure is applied only once in ten days or two weeks, so that the time it takes isn't much of a consideration. True, most of the old cases will yield to this remedy, but on general principles it is better to begin early.

Fleming's Spavin and Ringbone Paste

This black spot shows you how large a surface to cover when applying Fleming's Spavin and Ringbone Paste. If the blemish is small, even a smaller surface will be sufficient. The directions tell just what to do and how to do it, but we show the spot here because it serves well to illustrate how different this remedy is from any other, and we believe it to be just as much better as it is different.

Only three kinds of blemishes are to be treated with it—Bone Spavin, Ringbone, and Sidebone, and only the cases that are well defined and causing marked lameness. It is a remedy for the bad cases, even those that have lamed the horse for years, and have been fired and treated in all sorts of other ways unsuccessfully.

Do not try to treat the horse and work him at the same time. He must have rest in the stable and the usual time required is a month to six weeks.

We do not claim that Fleming's Spavin and Ringbone Paste will take off the enlargement, or help the appearance of the part in any way. Instead, it will destroy the hair upon the spot where the application is made, but a scar is better than lameness.

Fleming's Spavin Cure (Liquid) does not scar if rightly used, but that remedy is not intended for blemishes such as we have mentioned above, except when used just as the trouble is starting. It will often cure the older cases, especially when the animal is young, and if you have a fine horse and are particularly anxious to cure without a scar, we know of nothing else so likely to give you the result desired, but remember that we do not guarantee the Liquid for well established cases of Bone Spavin, Ringbone or Sidebone.

But Fleming's Spavin and Ringbone Paste is guaranteed to cure the lameness in any case of the kind, and if it fails to do it you get your money back. There is no need for us to tell how successful this remedy is—the following testimonials tell it, and tell it better than we could tell it ourselves.

For information concerning the different kinds of blemishes and different forms of lameness, see Fleming's Vest-Pocket Veterinary Adviser.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Cost \$10; Sold For \$75.

Dear Sirs:—The horse I used your Spavin and Ringbone Paste on is serviceably sound. I gave \$10 for him, and after treating him sold him for \$75.—L. S. Amos, Scio, Ohio.

Said He Couldn't Do It.

Gentlemen:—A few years ago I used your Spavin and Ringbone Paste on my driving mare

that had two Bone Spavins, and it was a complete success. I also cured a Ringbone on a neighbor's horse at about the same time. Another neighbor came to me yesterday and asked what it was that I did for those Bone Spavins, and when I told him he just gave me two dollars and told me to send and get some for him, for he has a horse with a bad Spavin. He and a veterinarian were at my house at the time I was treating the second Spavin and they told me that I could not do it, but I did just the same.—Byron Evans, Johnstown, Ohio, Route 5.

Sold as Sound.

Dear Sirs:—I cured a very lame horse of Bone Spavin with your Spavin and Ringbone Paste, and sold him as sound for \$250. I think it the best remedy for Spavin on the market.—H. L. Whiting, Portsmouth, N. H., Lafayette Road.

Did More Than We Promise.

Gentlemen:—I write to inform you that the Spavin and Ringbone Paste I ordered from you in October of last year has given satisfaction in every particular. I ordered the Paste for use on a very valuable mare that had been affected with Sidebone for several months. The case was well developed and lameness was quite marked. I used the Paste strictly according to your directions, and one application not only cured the lameness but has nearly removed the enlargement as well. I consider that the result has been worth more than \$50 to me.—O. W. Carper, New Castle, Va.

Most Useless Horse You Ever Saw.

Dear Sirs:—Eleven years ago I got a bottle of Spavin and Ringbone Paste from you and it did so nice a job on a Bone Spavin that the man who had owned this horse could not tell which leg it had been on. It did not go away all at once, but in the course of a year it was all gone. She also had a Ringbone on the same leg and I cured that as well. She was the most useless horse you ever saw in your life. She was so lame that she could not get out of the stable, but shortly after the sores were healed she was not a bit lame. She lived and was a first-rate work horse until her teeth were all gone. I wish to ask you to please send me a copy of your Veterinary Adviser.—Mrs. E. Nolan, Wilton, Conn.

The two preceding letters refer to cases in which the blemish was removed as well as the lameness being overcome. This is more than we promise. You cannot depend upon helping the appearance of the part at all, and usually the hair is destroyed upon the surface where the Paste is applied. In a considerable number of cases the result is all that could possibly be desired, just as stated in these letters, but we do not wish you to treat expecting to do as well, because in most instances the enlargement remains, and there is a small scar. Anyone, however, should be well satisfied with getting rid of the lameness, and it is for that purpose that the Paste is recommended and guaranteed.

Former Owner Wanted Her.

Dear Sirs:—Last winter I bought a horse that had two Bone Spavins. They had been on for three years and were so bad that the horse could not stand alone to be shod. I used your Spavin and Ringbone Paste, since which I have been offered \$75 more than I paid for her by the same man that I got her from. She is sound and I have worked her at all my farming.—J. H. Townsend, White Sulphur Springs, N. Y.

\$200 Horse for \$65.

Gentlemen:—I have a very fine horse which is a nice free driver. He had a Ringbone and I cured it with your Spavin and Ringbone Paste. He has not limped in over one year. I paid \$65

June 21
Summer
Begins

Some cases of Heaves are much worse during warm weather, so that the horse cannot work at all. Use Fleming's Tonic Heave Remedy, and you will likely find that the horse can work in comfort the summer through. Likely, too, the case will be cured completely, but if not the benefit derived and the extra work the horse is able to do will be worth many times the cost, —otherwise, your money back.

A string of horses twenty miles long, as close as they could walk one behind another, would just about represent the cures effected every year with Fleming's Fistula and Poll Evil Cure. In point of annual profit to us, this remedy is not so important as some of the others, but considering it from the horse-owner's standpoint, the actual money value of the work it does makes it the most important of them all. Read the testimonials, and you will realize that there are many thousands of horses at work today that would have been dead but for this remedy.

for him. Now it would take \$200 to buy him.—
O. H. Knapp, Mansfield, Pa.

Bad Sidebones.

Gentlemen:—After waiting for over twelve months, I am now writing to tell you truthfully that the Spavin and Ringbone Paste that I purchased of you has made a complete and permanent cure of a bad Sidebone on each side of my mare's foot, of at least two year's standing. She was so lame that she could hardly use that foot at all. One application upon each side did the work, and since that I have plowed her a lot and have done some very heavy wagoning with her. I have also driven her on long, hard drives, and have not yet seen one symptom of lameness. The blemishes are there and there is a scar on each side of the foot, but the lameness is gone. I have also used your Tonic Heave Remedy and your Veterinary Eye Lotion with equally satisfactory results. If this can be of any help, I hope that you will publish it, for I feel a pressing anxiety that the world at large should know more about these wonderful remedies.—Ben Casey, Wilson Mills, N. C.

Seventeen Cents Each.

Dear Sirs:—Enclosed find one dollar, for which please send me your Tonic Heave Remedy. The Spavin and Ringbone Paste that I got from you a year ago cured three horses perfectly sound, and I sold the rest of the package for \$1.50.—
J. M. Harris, Elmington, Va.

Now Worth \$500.

Dear Sirs:—Please send me a Vest-Pocket Veterinary Adviser. Will also say that I have a horse that was spavined so bad he could hardly walk. I used one application of your Spavin and Ringbone Paste and he is now worth \$500 and has a record of 2:17½. Had used five different remedies before I used your Paste.—
B. B. McCrea, Americus, Ga., Route 3.

Cured Five.

Dear Sirs:—I will send you my testimony. I have cured five cases with one bottle of your Spavin and Ringbone Paste. Some of them were old cases and had been burned and doctored with, but your Paste did the work. I can recommend it as being all that you claim.—
W. A. Weiss, Cloverland, Wash.

Wouldn't Come to Water.

Gentlemen:—Last year I sent for some of your remedies, among which was a package of your Spavin and Ringbone Paste. I used this on a horse that had Ringbones on both fore feet. This horse could hardly walk and would not come up for water for days at a time. Today he is working right along on the farm.—
Chas. D. Smith, Tassajara, Calif.

Went on Three Legs.

Dear Sirs:—The Spavin and Ringbone Paste that I bought of you three years ago did the work all right. I used it on a mare that had been treated by different men and with different remedies without any benefit. She had the worst Bone Spavin that I ever saw. She was so lame she went on three legs. I bought her for \$20 and nobody thought she would ever be able to work any more, but since using your Spavin and Ringbone Paste she can do as much work as she could before she had the Spavin. She has raised me three colts and I would not take \$100 for her now.—
J. A. Grigsby, Rogersville, Ala.

Had Been Doctored Three Years.

Dear Sirs:—I have tried your Spavin and Ringbone Paste and I find it all right. It cured a Ringbone that had been doctored for three years, and one application did it. I had enough left with which to cure two more Ringbones and one Bone Spavin.—
Ira Jordan, Kiona, Wash.

Two Had Failed.

Gentlemen:—One application of the Spavin and Ringbone Paste that I received from you two years ago cured my horse of Ringbone, after two veterinarians had failed to cure him. I also ordered a bottle of your Colic Cure, but have not used it yet. Thank you for the Almanac received.—
John Engelmeyer, Burke, S. D.

Four Doctors Gave Up.

Gents:—I have used your Spavin and Ringbone Paste and it saved me a young horse now worth \$250. This horse was positively useless for two years, and four veterinarians had got through and given it up; then I cured him with your Paste.—
Chas. C. Brosius, Chatham, Pa.

Had Little Faith.

Dear Sirs:—I purchased a bottle of your Spavin and Ringbone Paste last winter. I had but little faith in it at first, but two applications changed my mind. It was a very bad case of Ringbone. The lameness was removed and I had enough left to cure half a dozen other cases. I can heartily recommend it for any case of Ringbone.—
Louis Wilson, Wolcottville, Ind.

Firing Failed.

Gentlemen:—Your Spavin and Ringbone Paste certainly does the work. It cured a Spavin on a mare that had been fired once and blistered three times by veterinarians, and their work was wasted and so was my money. Your Paste did the business all right and it cost me but two dollars.—
Chas. G. Kenyon, Tyrone, Okla.

Paid Well.

Dear Sirs:—I sent for your Spavin and Ringbone Paste four years ago and have had good results. I bought a horse seven years old for \$80. It had had Bone Spavin for four years. It was so lame that I could hardly get him out of the barn in the morning. He had been fired and everything else, but it did not help him any. After two applications of your Paste he was cured. I worked him two years and then sold him for \$150, so I think I got good pay for my investment.—
Geo. Buchman, Fremont, Ohio, Route 8.

Observe that several of these testimonials mention cases being cured after they had been fired unsuccessfully. A good many people think that if firing doesn't cure, nothing will; in fact, most veterinarians depend upon firing almost exclusively. It makes no difference to us whether a case has been fired or not, because failure of that sort of treatment is no indication that our Spavin and Ringbone Paste will fail. The practice of firing originated away back in the time when the village blacksmith was also the farrier or horse doctor, and, of course, it is just the kind of treatment that a blacksmith might be expected to invent.

Thought It a Humbug.

Dear Sirs:—I got a bottle of your Spavin and Ringbone Paste and cured two Ringbones with it. Still have enough left to cure half a dozen more. I thought at first it was a humbug, but I found out different, so now I am sending a postal money order for two dollars. Please send me a bottle of your Fistula and Poll Evil Cure.—
Chas. Flore, Leavenworth, Kans., Route 4.

Five Made Sound.

Dear Sirs:—I have used your Spavin and Ringbone Paste on five different horses, and every one of them is as sound as he ever was, or as any horse can be.—
J. C. Roberts, Marlow, N. H.

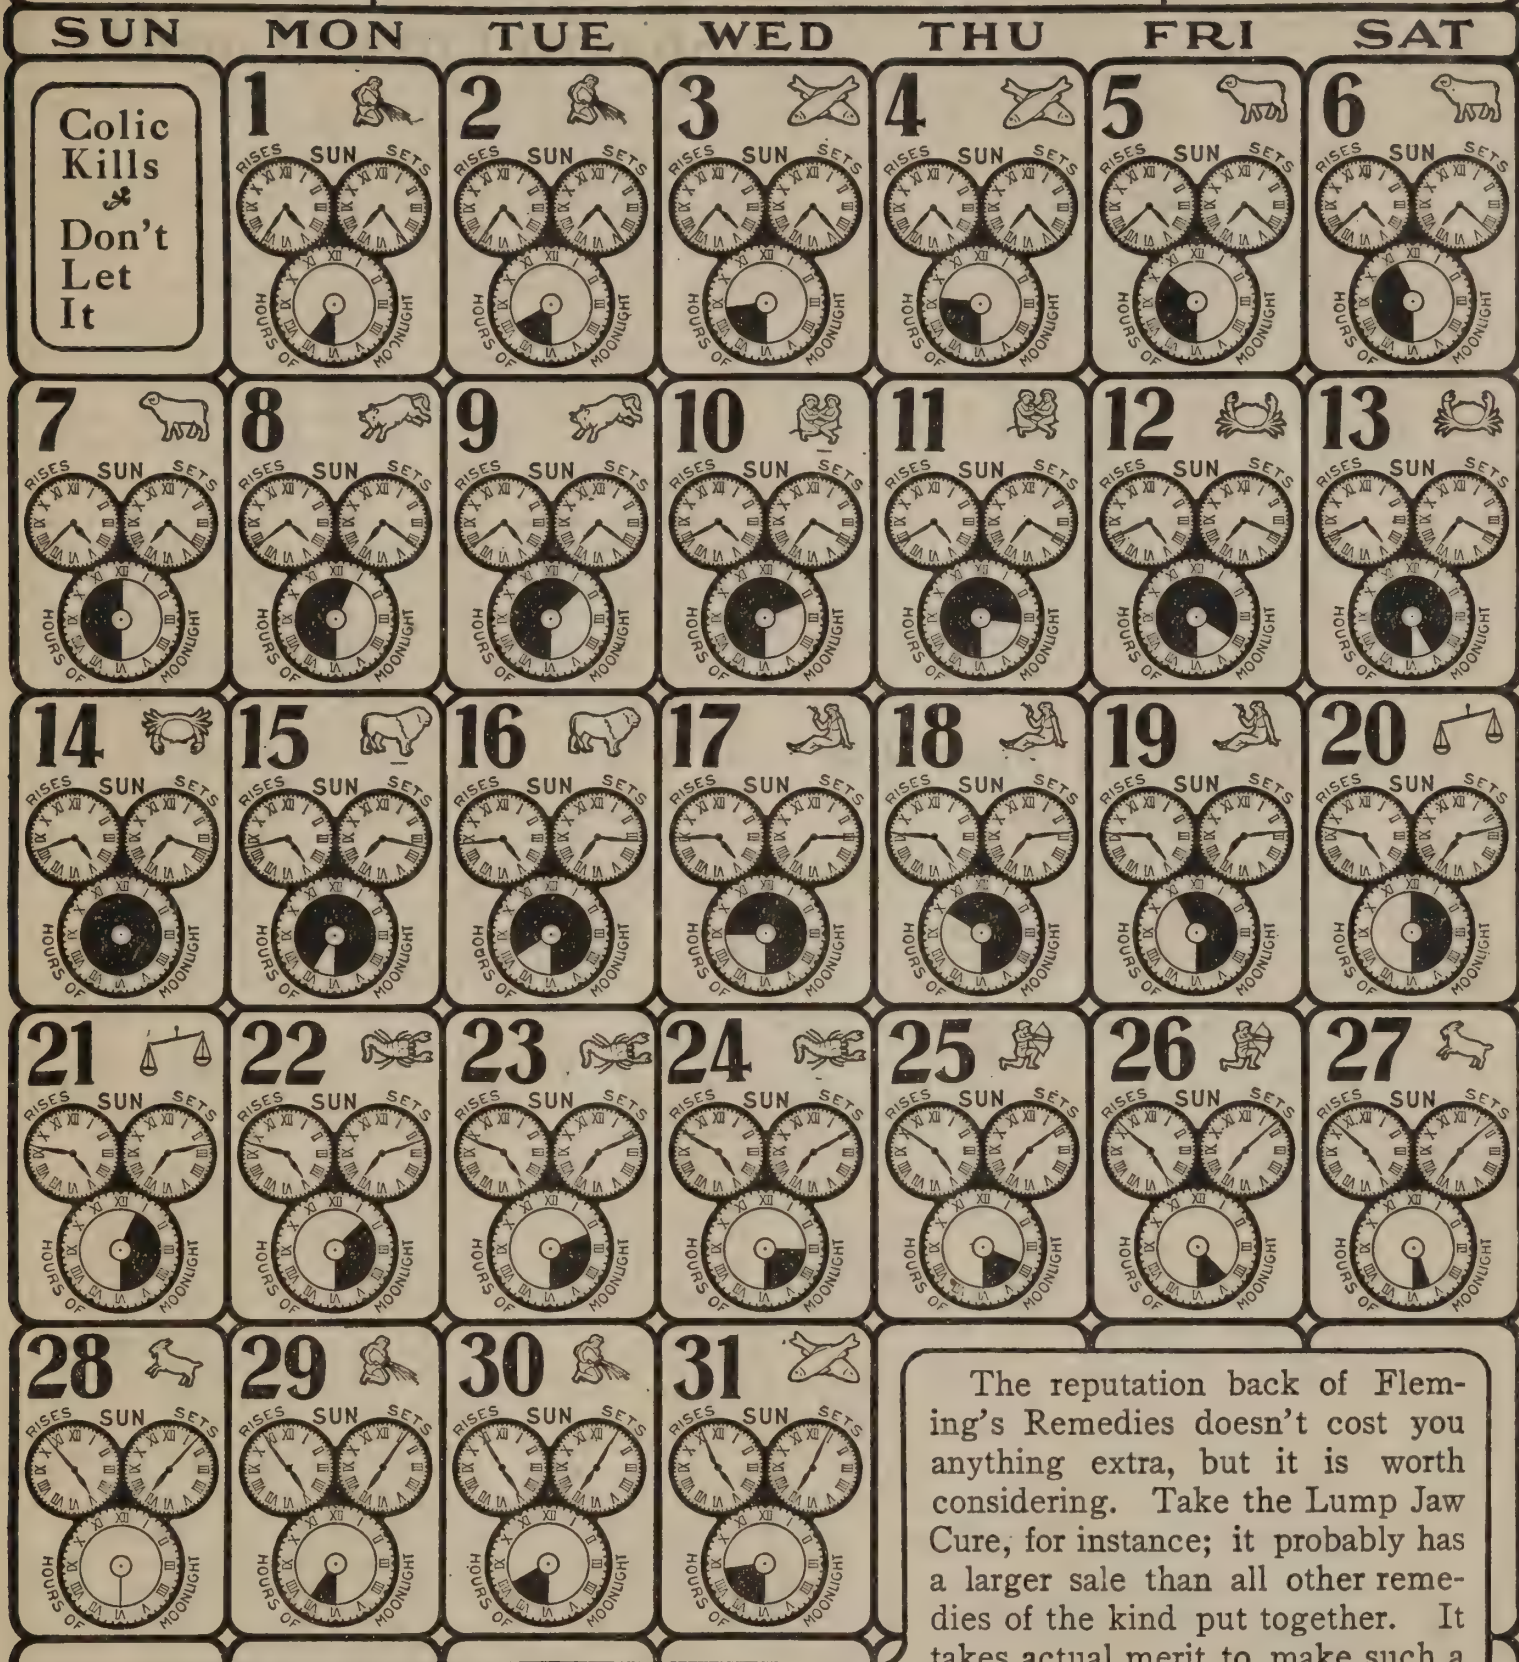

\$50 Horse Worth \$200.

Dear Sirs:—I dealt with you about four years ago and bought a bottle of your Spavin and Ringbone Paste. The horse at that time could have been bought for \$50, but I have since refused \$175 for him, and am holding him at \$200.—
Robert F. Bowles, Swetman, Va., Box 44.

thing successful, and Fleming's Lump Jaw Cure is the one big success in its line. It was first put out years ago, when most people thought Lump Jaw incurable. It soon proved its worth, and the demand has increased steadily each year since. Other things of the kind have come and gone, but Fleming's stays. It stays because it does the work, and people know that they can rely on it. The same reputation is back of all of Fleming's Remedies,—and not only that, but they are all guaranteed in a way that means something.

Bottle Cured Ten.

Gentlemen:—I enclose two dollars, for which please send me a bottle of Fleming's Spavin Cure (Liquid). I have a mare five years old that has a Curb. I have used one bottle of your Spavin and Ringbone Paste and have cured ten horses with it. It is the best medicine that I have ever tried. —Nels Christensen, Foreston, Minn., Box 56.

Sound and Valuable.

Gentlemen:—I want to extend to you the thanks due you for the manner in which your Spavin and Ringbone Paste has restored my ruined horse to a sound and valuable animal. I had tried two well-known remedies without any result and had almost given up, when I chanced upon your advertisement. All that was necessary was one treatment, and I wish you all possible success in your good work.—John Synnes, Helena, Mont., Box 305.

Has Had No Failures.

Dear Sirs:—I am sending you two dollars for a bottle of Fleming's Spavin and Ringbone Paste. Please send as soon as possible. Have used four bottles and have had no failures.—Robert Hudlow, Hillyard, Wash., Route 2.

Preventing Grain Smut and Potato Scab

For Wheat, Oats, Barley, and Millet.—Use formalin (40 per cent solution of formaldehyde) at the rate of one pound of the liquid to 45 or 50 gallons of water. Use any method of wetting the grain most suited to your means. Sprinkling and shoveling is as effective as dipping, if carefully done. It is well to treat one day and allow the grain to remain piled up over night, thus allowing the fumes of the solution to act throughout the pile.

Cautions.—(1) In the case of oats and barley the wetting must be more thorough than in the case of wheat, so that the formalin or gas may penetrate beneath the husks of the grain. (2) Do not allow wet grain to remain in a pile long enough to get hot. A very slight degree of fermentation may greatly reduce the yield.

For Potato-Scab.—Soak the tubers before cutting one hour and a half in a solution of formalin at the rate of one pound of the liquid to thirty gallons of water.

Note.—The potato-scab fungus lives from year to year in the soil and upon old vines. Hence it is wise to try to keep it off your lands, by treating all seed-tubers.

Storing Sweet Potatoes

The following, taken from a farm paper, may be useful to some of the readers of this almanac. It is not stated, but we suppose that the boxes and barrels containing the potatoes were stored in a dry cellar where freezing would be impossible.

"We dig our sweet potatoes before frost catches them. If a frost does happen to come before we get them dug, the vines are cut off just under the ground, before the sun gets on the vines the next morning. We always aim to dig them, or rather plow them, out on a bright, sunny day, and pack them the next day, or as soon as possible. We procure large goods boxes or sugar barrels, and put a layer of cut straw in them, then a layer of sweet potatoes, just enough so the potatoes will not touch one another, and so on until the box or barrel is full. I like this way much better than wrapping in paper. I have tried both. Last fall I packed twelve bushels this way, and I have not to this date (July) taken any rotten ones cut at all. We have more than a bushel of them yet. We have them to eat all winter the same as Irish potatoes."

Fleming's Spavin Cure (Liquid)

This remedy is in liquid form, but it is not a liniment. If used like a liniment, you would be using too much. The directions will make that plain.

Fleming's Spavin Cure (Liquid) is used upon all blemishes except such as we advise treating with the Spavin and Ringbone Paste. In order that you may more clearly understand what to use it for and what to expect it to do, we will give brief mention to the principal kinds of cases for which it affords a suitable treatment.

Bog Spavin:—If the horse is lame or shows signs of weakness in the part, treat the case, using Fleming's Spavin Cure (Liquid). It will cure the lameness and nearly always take away the enlargement. If there is no lameness the bunch is apt to be obstinate, and its removal more doubtful than in cases where lameness is present. We think that treatment is successful in only about 75 per cent. of such cases, so unless the bunch seems to be increasing we do not urge attempting to remove it, and especially if the horse is of the large-boned type.

Bog Spavins and similar puffy enlargements sometimes appear upon the hocks of young colts. Usually in these cases there is no lameness and we advise letting them alone, as they will in most instances disappear of their own accord where the animal is under two years old.

Some confuse Bog Spavin and Blood Spavin. Blood Spavin is merely a dilation of the vein crossing the part. It is both harmless and incurable.

Thoroughpin:—This is practically the same in character as Bog Spavin, but differently situated. What is said in reference to treating Bog Spavin applies to Thoroughpin also.

Capped Hock:—A few treatments with Fleming's Spavin Cure (Liquid) will remove this blemish completely, unless the case is unreasonably old. If it has been there a year or more and is causing no trouble, let it alone.

Splint:—Treat all recent cases with Fleming's Spavin Cure (Liquid), whether causing lameness or not. This will remove them entirely. Of the old cases, six months or over, treat only those causing lameness, for with time the bunch hardens down and cannot be removed.

Curb:—What is said about Splint applies in a general way to Curb. Treat all the new cases, and all the old ones that are giving trouble.

Wind Galls:—These blemishes are nearly always harmless. They can often be removed, but treating for this result is uncertain, so we do not urge it. If they cause lameness, treat them, using Fleming's Spavin Cure (Liquid).

Callous Bunches:—Fleming's Spavin Cure (Liquid) is the surest remedy you can use to reduce blemishes resulting from wire cuts, kicks and other injuries. It is usually effective in such cases.

Stifle Lameness:—Allow rest and use Fleming's Spavin Cure (Liquid) on a small spot over the affected part, repeating on different spots at intervals of ten days or two weeks. The remedy has been very successful in cases of this kind.

Recent Bone Spavin:—If you catch a Bone or "Jack" Spavin in the very beginning, and especially if the animal is young, you can cure the lameness permanently and nearly always take the bunch away smooth and clean with Fleming's Spavin Cure (Liquid), and this without leaving a mark or scar. But notice that we say RECENT cases—we do not claim that it will produce such results where the blemish has become well established. It does frequently

Look out for wire cuts and other wounds at this season of the year. Such injuries are dangerous at any time, but heat and flies increase the danger. Keep Fleming's Veterinary Healing Oil handy, and use it promptly before infection gets a start.

If you use Fleming's Remedies, we want it to be because your own personal judgment recommends them. We do not want to force our goods upon anybody, and our advertising is not for that purpose. Its only purpose is to set the facts before you for consideration, and, when that has been done, if you believe that some other form of treatment is preferable, your decision should be made accordingly. If one's goods have the merit they ought to have, the plain truth is all that need be told to insure a wide sale.

MOON'S PHASES.

cure the lameness in the older cases, and if you happen to have the remedy on hand it is well to give it a trial. But if you are ordering a remedy to treat Bone Spavin that has been observed for six months or so and is causing marked lameness, get Fleming's Spavin and Ringbone Paste. Let Bone Spavin alone altogether if there are no signs of lameness.

Recent Ringbone:—Where Ringbone is just beginning to lame a young horse, use Fleming's Spavin Cure (Liquid), especially if you wish to avoid a scar. The bunch cannot be reduced except in a few of the most recent cases. Where the case is somewhat advanced the Spavin and Ringbone Paste will be required, but do not treat with this remedy unless there is marked lameness.

Recent Sidebone:—What we have said about Ringbone will apply to Sidebone also, which is much the same and requires the same treatment.

Fleming's Spavin Cure (Liquid) does not scar the horse. It blisters, but the hair grows in again when the part is healed.

We guarantee it to the extent of the claims we make for it, and refund the money if it fails. It has a number of uses not mentioned above, but explained in Fleming's Vest-Pocket Veterinary Adviser. We refer you to this book for illustrations and descriptions of different kinds of blemishes and forms of lameness.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

One Bottle Saved \$200.

Dear Sirs:—I can recommend your Spavin Cure (Liquid) as one of the best remedies I ever saw. The veterinarian could not cure my mare, and I had tried everything. She was so lame I would have to help her up. She is now sound and well. She had the worst case of Bog Spavin I ever saw. That two-dollar bottle saved me at least \$200. She has a fine black colt now worth at least \$90, a perfect beauty. I will gladly recommend your remedies to any one in need of them.—Wade Garriott, Pekin, Ind., Route 12.

Worth \$175 More.

Gentlemen:—I bought from you a bottle of Spavin Cure (Liquid) and used it on a mare that was not worth \$50 at the time. One treatment cured her, and I have now refused \$225 for her.—James Jones, Kerrville, Tenn., Route 2.

Two Bogs and Three Thoroughpins.

Gentlemen:—I have used your Spavin Cure (Liquid), and it cured two Bog Spavins and three Thoroughpins with only about half of the bottle. I also used your Sweeny Cure on a four-year-old that was so lame he could scarcely walk, and I had him sound in less than a month. I must say your remedies are wonderful.—D. Clyde Shultz, Danville, Pa., Route 1.

Made \$60.

Dear Sirs:—The bottle of Spavin Cure (Liquid) that I bought of you two years ago last fall made me \$60. I sold the mule for \$135, but \$75 would have been a fair price for him before I used your remedy.—R. L. McCracken, Bunker Hill, Tenn.

Greatest on Earth.

Gentlemen:—The Spavin Cure (Liquid) that I got from you did everything that you claim for it in the way of curing Bog Spavin. I think it is the greatest medicine on earth for such blemishes.—S. W. Pope, Yazoo City, Miss.

Trainer Recommends it.

Dear Sirs:—I wish to say that I very highly recommend your Spavin Cure (Liquid). It cured a bad Bog Spavin on a saddle horse of mine. He is perfectly sound now. I also cured two cases of Sweeny with your Sweeny Cure. I am a horse trainer, and such things come under my notice very often, so that I have a good opportunity to recommend your remedies. Find enclosed \$1 for a bottle of your Colic Cure.—D. Wayne George, Harding, So. Dak.

Bad Splint.

Dear Sirs:—I will write you to let you know that I got great results from your Spavin Cure (Liquid). My horse was lame for a year with a Splint at his knee, and it has cured him of his lameness. I also have a horse that had a very bad Ringbone, which I cured with your Spavin and Ringbone Paste. He was lame for two years, and could not step on that foot at all. I am now driving him on the road every day, and he isn't a bit lame. It makes no difference how far I drive, he doesn't limp one step. One of my neighbors had a horse with a Ringbone and I told him to send to you for the Paste. He did so, and his horse is all O. K. today. Your remedies are the best I ever saw, and will do whatever you say they will.—Henry Moore, Compton, Ill., Route 1.

Several Splints.

Dear Sirs:—Three years ago I bought a bottle of your Spavin Cure (Liquid). I have taken several Splints off with it. We have very few horses in this country with blemishes, and Splints are the only thing any of our horses ever have. One application is all I ever used to remove a Splint.—W. M. Marteny, Arivaca, Ariz.

Stifle Lameness.

Gentlemen:—Enclosed find money order for \$2.00, for which send me one bottle of your Spavin Cure (Liquid). It works like a charm. The last bottle I got cured a very bad case of Stifle Lameness. The bunch was as big as my head, but now it is no bigger than a walnut.—Robt. Spiecher, Charlotte, Ill.

Could Hardly Walk.

Gentlemen:—Some seven or eight years ago I purchased a bottle of your Spavin Cure (Liquid). I wanted it to cure a Splint on a horse I was driving at the time, or had been until he became so lame he could hardly walk. This was after one of our best veterinarians had blistered him and done the best he knew for him for a month or two. One application cured the Splint so that he never limped afterward and does not today. It also removed the lump so that a month after one could not tell where the Splint had been.—Will Waymire, Central Stables, Tacoma, Wash.

Curb.

Gentlemen:—I have cured a Curb on a young mare with your Spavin Cure (Liquid). She is sound now, and is worth at least \$50 more to me.—Leo. E. Stebbins, Algona, Iowa.

Effect of Wire Cut.

Dear Sirs:—I have a horse that was cut by wire, and when the foot healed there were large calloused bunches, and the horse was so lame that he was not worth \$5. I got some of your Spavin Cure (Liquid), which reduced these enlargements and took out the lameness, so that I now consider him worth \$200.—Anton T. Strommen, Stanley, N. Dak., Route 1.

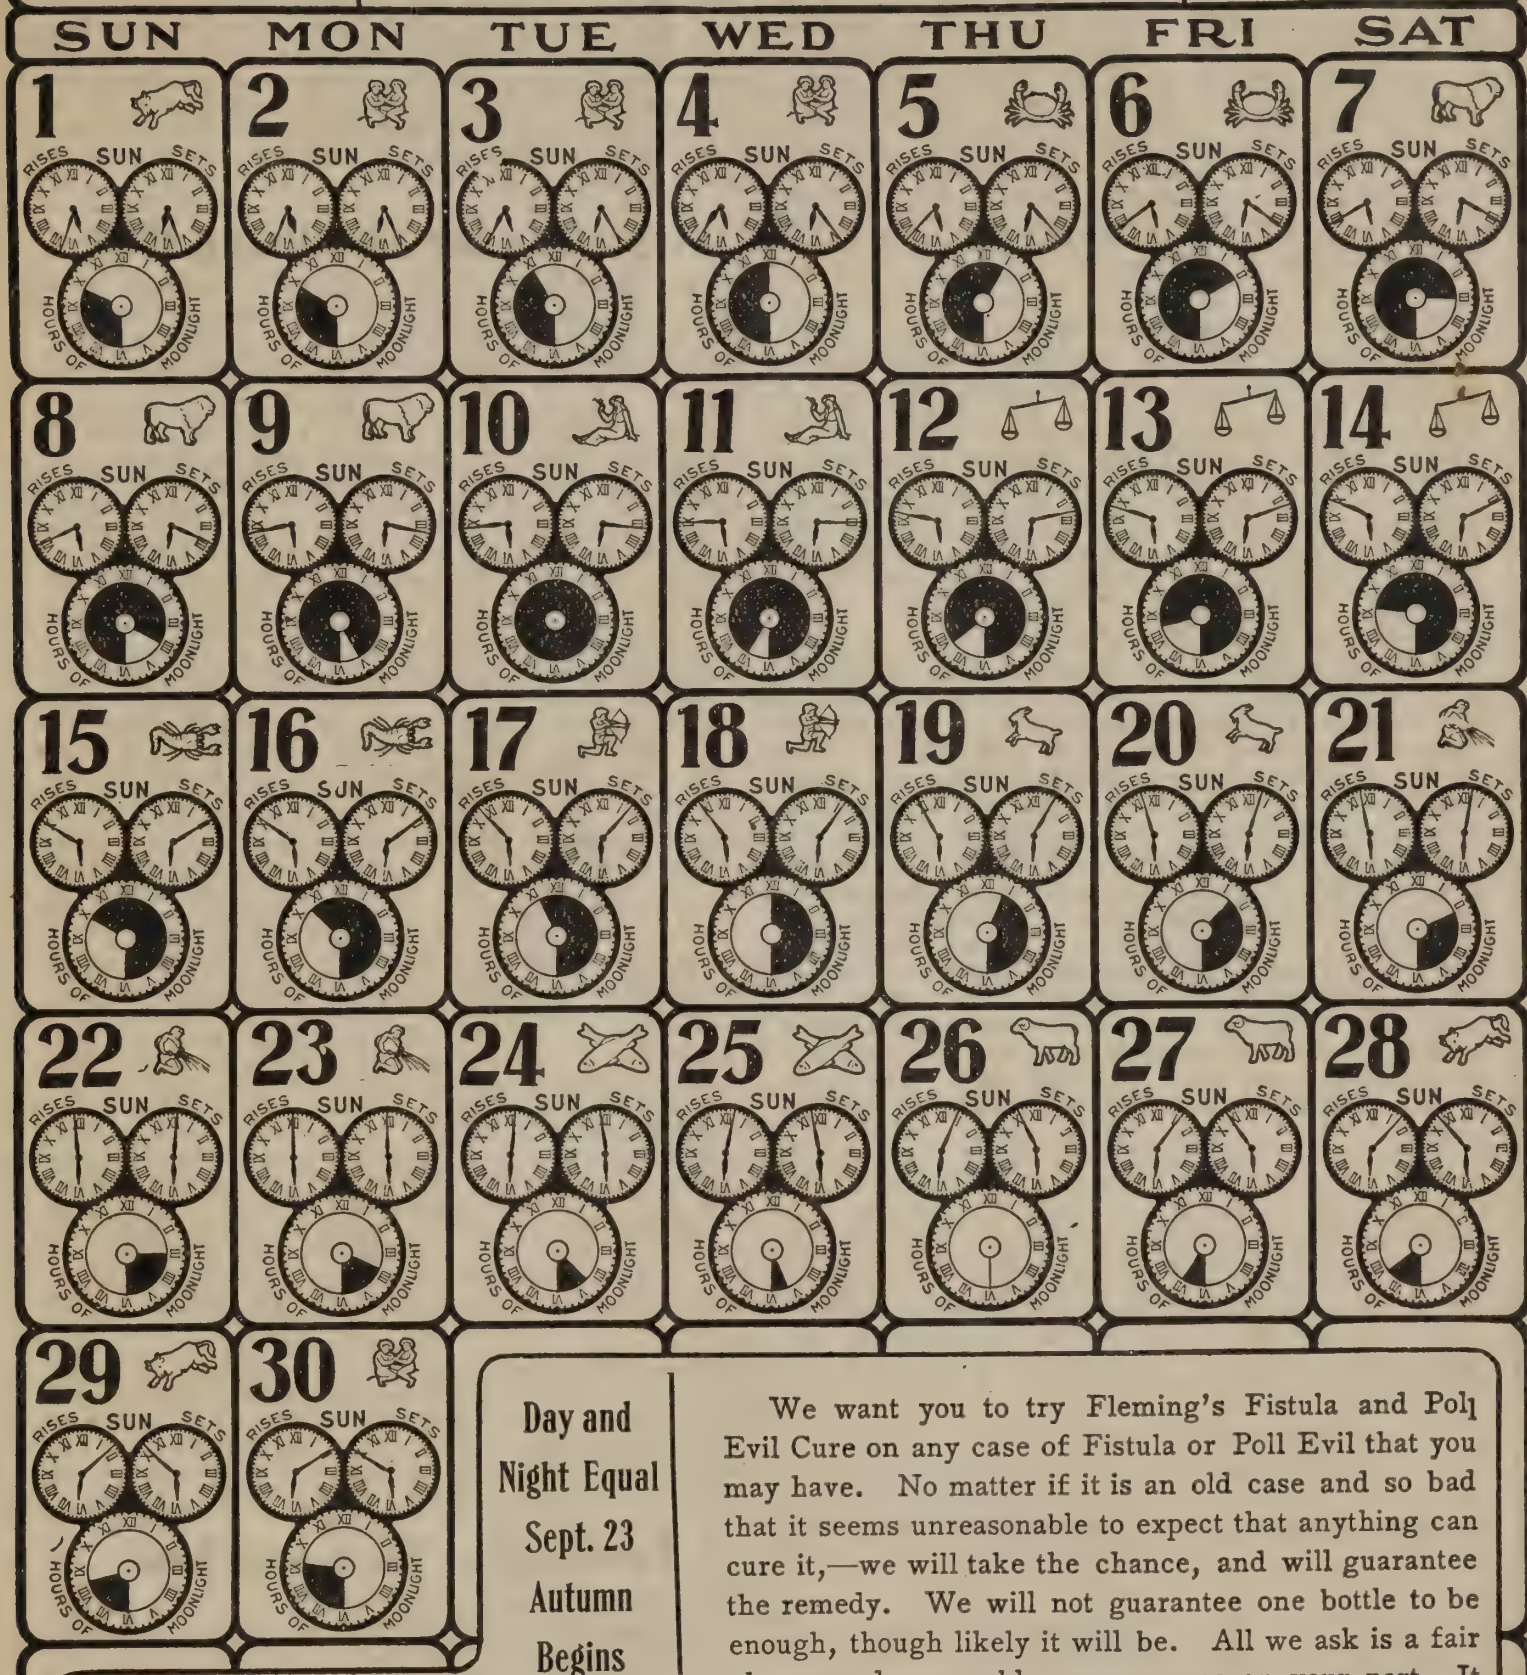

Others Failed.

Dear Sirs:—Will write you in regard to my horse that got his hock sprained last September. I bought a bottle of liniment and used it all up, then some of my neighbors told me to get a bottle ofs Spavin Cure and it would

The Time shown by the
Dials conforms to the

what is called Solar Time

SEPTEMBER, 1912

The Light Portion of each
Lower Dial shows the
Hours of the Night that will
be Lighted by the Moon

will not be much of a task. You treat the horse only every fifth day, and it takes only a few minutes each time. If you cure him, as you likely will, you will be quite a bit ahead,—you will have a good sound horse instead of a horse that nobody would want. You will have practically made whatever the horse is worth, and it will be a satisfaction to you aside from that consideration. Read the Fistula and Poll Evil testimonials, surely some of those cases must have been as bad as yours.

MOON'S PHASES

surely cure the horse. Well, I got it and it blistered some several times, but did not do any good; then others told me to get a bottle of and I did so, paying \$1.50 for it. I used half of it and still he was as lame as ever. I knew of your Spavin Cure (Liquid) all of the time, but I could get these other remedies sooner, so just used them instead. At last, I decided to send for your Spavin Cure (Liquid). It was a complete success, and my horse is sound and well. I do not mind spending money if I receive the benefit. I have used several of your remedies, and everything that I have gotten from you done its work nicely.—L. O. Herrick, Ougo, Mo.

Bad Sprain.

Dear Sirs:—I sent for a bottle of your Spavin Cure (Liquid) over a year ago, and used it on a badly sprained ankle on a fine saddle horse. His ankle was as large as a gallon pail. It was pretty stubborn and I kept using a little of the remedy every few weeks for several months, but it cured it sound and well, and the blemish all left. One of my neighbors has a filly and her knee joints began to enlarge this spring. I put on your Spavin Cure and the knees are all right.—J. A. Reed, Cairo, Neb., Route 1.

Fleming's Spavin Cure (Liquid) has a wide variety of uses, not all of which are mentioned in these testimonials. It is an excellent remedy for numerous kinds of cases, but, of course, we cannot guarantee it to cure everything. The three preceding letters speak of unusual cases, each due to a severe injury, the exact extent of which was unknown, and for which reason we would not feel justified in holding out strong encouragement of a complete cure. Nevertheless, a cure was effected in each instance, and it is only by making a trial that one can determine what may be accomplished in these various uncommon and doubtful cases. By making the trial the writers of these three letters each saved a valuable horse. If they had not received benefit worth at least the cost of the remedy, they would have been entitled to their money back.

Bog and Thoroughpin.

Gentlemen:—About six years ago I got one bottle of your Spavin Cure (Liquid) and used it on a Bog Spavin and Thoroughpin on the same horse and the same leg. It took the bunches off so that you could never notice that anything had been wrong. No matter how much you drive him now, the horse is not lame at all.—C. E. Blake, Port Matilda, Pa., Route 1.

Two Splints and One Curb.

Dear Sirs:—The Spavin Cure (Liquid) I purchased of you last spring gave excellent satisfaction. I cured with it two Splints and one Curb, and have over half the bottle yet.—Theodore Klemann, Saukville, Wis., Route 1.

Should Have Had It On Hand.

Dear Sirs:—Last fall I bought a bottle of Spavin Cure (Liquid) and used it on a four-year-old Belgian colt. He had Bog Spavin and Thoroughpin on both hind legs. I cured it in fine shape without a scar. But my work was all for nothing. We found him sick yesterday with Colic. We did all we could for him, but he died standing up at 4 P. M., and I have charged \$225 to the loss side. Please find enclosed \$1 for a bottle of Fleming's Colic Cure.—John T. Gardner, Kingsbury, Ind., Route 1.

The feeding of late corn fodder to dairy cows should be continued just as long as the corn is at all green. It is a splendid supplementary feed with the short autumn pasture grass.

Most farm horses get too much hay. Cut down the amount and feed it mostly at night. Thorough dampening lessens the danger from feeding dusty hay.

Killing House Flies

The London "Lancet" recommends formaldehyde as the best and simplest killer of house flies. It is inexpensive and any druggist can supply it. Put a tablespoonful in a pint of water, and place in plates or saucers throughout the house, closing windows and doors. It is practically nonpoisonous except to insects and micro-organisms. Insect powder burned in a room will also kill the flies.

Directions for Sterilizing Milk

The sterilization of milk for children, now quite extensively practiced in order to destroy the injurious germs which it may contain, can be satisfactorily accomplished with very simple apparatus. The vessel containing the milk, which may be the bottle from which it is to be used or any other suitable vessel, is placed inside of a larger vessel of metal, which contains the water. If a bottle, it is plugged with absorbent cotton, if this is at hand, or, in its absence, other clean cotton will answer. A small fruit-jar loosely covered may be used instead of a bottle. The requirements are simply that the interior vessel shall be raised about half an inch above the bottom of the other, and that the water shall reach nearly or quite as high as the milk. The apparatus is then heated on a range or stove until the water reaches a temperature of 155 degrees Fahrenheit, when it is removed from the heat and kept tightly covered for half an hour. The milk bottles are then taken out and kept in a cool place. The milk may be used any time within twenty-four hours. A temperature of 150 degrees maintained for half an hour is sufficient to destroy any germs likely to be present in the milk, and it is found in practice that raising the temperature to 155 degrees and then allowing it to stand in the heated water for half an hour insures the proper temperature for the required time. The temperature should not be raised above 155 degrees, otherwise the taste and quality of the milk will be impaired. The simplest plan is to take a tin pail and invert a perforated tin pie-plate in the bottom, or have made for it a removable false bottom perforated with holes and having legs half an inch high to allow circulation of the water. The milk bottle is set on this false bottom and sufficient water is put into the pail to reach the level of the surface of the milk in the bottle. A hole may be punched in the cover of the pail, a cork inserted, and a chemical thermometer put through the cork, so that the bulb dips into the water. The temperature can thus be watched without removing the cover. If preferred an ordinary dairy thermometer may be used and the temperature tested from time to time by removing the lid. This is very easily arranged, and is just as satisfactory as the patented apparatus sold for the same purpose.

Feeding for Pork and Beef

Experiments show that there is 15 to 20 per cent more value in grain fed a hog in good pasture than fed in a pen or yard. The pig will do very well on clover pasture alone, but a little grain will give enough better pig to pay for the additional cost several times. A good supply of skim milk with a very little grain on alfalfa pasture makes excellent pork and makes it at the lowest cost. Both pigs and hogs will do better and be freer from disease when in sunny quarters than they will in dark, damp quarters.

Cattle should be fattened as quickly as possible. It seldom pays to prolong the feeding even though a man may think he will strike a better market later. While heavy feeding is not so good at the start, the amount of grain should be increased from time to time until the cattle are on a full feed. Plenty of roughness should always be provided, and the herd should have free access to pure water and good salt.

The horse that shuns whole grain usually has something wrong with his teeth.

The satisfaction of
knowing that you are
prepared for Colic is
worth more than the
price of Fleming's
Colic Cure.

Now is a good
time to treat
Spavins
and
Ringbones.

On many farms every horse is needed during the summer season. Some of them may be lame from Bone Spavin, Ringbone, etc., but not too lame to be of use, and it has been impossible to lay them off for treatment. It is not practicable to attempt to cure a Bone Spavin or Ringbone and work the horse at the same time. One should be prepared to allow complete rest, and as much of it as may be needed. Usually about six weeks' rest is required to properly treat a case with Fleming's Spavin and Ringbone Paste. Team work on most farms will soon ease up now, so that the lame horses may be given attention, and there is no better time of the year for treating such cases.

Fleming's Tonic Heave Remedy

If you have a horse that needs something in the way of a tonic and blood purifier, give him Fleming's Tonic Heave Remedy.

That may seem odd, considering that he hasn't the Heaves, but the explanation is that the only reason it cures Heaves is because it is so good a tonic.

It is pretty generally conceded that Heaves proper is not a disease of the lungs, but rather a reflex nervous disorder, usually arising from digestive derangement. This explains why overfeeding, drinking too copiously of cold water, etc., so often tends to aggravate the heaving.

Broadly speaking, a tonic is a remedy that tends to correct trouble wherever it exists. This is done by gradually and permanently improving digestion and assimilation, and imparting strength and tone to the whole system. It is clearly seen, therefore, why a tonic remedy is the correct remedy for Heaves.

It would be wrong to say that all cases of Heaves are curable. We offer this remedy, not as a certain cure, but as the best we are able to supply, and, as we believe, the best remedy for Heaves that has ever been prepared.

Cases vary. Some are more easily cured than others, regardless of how bad they seem to be or how long they have existed. The usual quantity required is one to three packages. Even if no improvement is seen from the first package, it is advisable to use a second, as our experience shows that many cases are slow to yield at first, but come out all right in the end. It is not to be supposed that we guarantee one package to be enough, or that we will send extra packages on trial. Where a mare having Heaves is in foal, the remedy is not apt to benefit as it otherwise would, and we advise deferring treatment until after foaling time.

Do not use Fleming's Tonic Heave Remedy with a view to quickly and temporarily suppressing the symptoms in order to make a trade. It acts slowly and is calculated to cure rather than produce apparent cures.

The percentage of cases that will not yield to proper treatment with this remedy is comparatively small, and even those that are not cured are usually so far relieved that the animal is able to work in comfort, so that the benefit derived is worth more than the money expended. If, however any one is not satisfied with the results, we will refund the price he paid.

For more complete information upon Heaves, and also other respiratory affections, see Fleming's Vest-Pocket Veterinary Adviser.

Good for Many Ailments

Being an excellent general tonic and blood purifier for horses, Fleming's Tonic Heave

Remedy is remarkably good for a variety of disorders, such as thin flesh, hide-bound, rough coat, general weakness, indigestion, catarrhal troubles, chronic coughs, blood derangement, skin disease, etc. For putting run-down horses in condition, or to tone up the system at shedding time in the spring, we do not think anything can equal it. It is easily given, any horse will take it readily, and it is economical to use for these purposes because a package goes so far.

Per package, \$1. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Nearly Dead With Heaves.

Dear Sirs:—Last July I sent to you for five dollars worth of your Tonic Heave Remedy, as my horse was nearly dead with Heaves and had a bad cough. He is all right now and is at work. I am very thankful that I heard of your remedy in time to save my horse.—M. A. DeWitt, Stittville, N. Y., Route 1.

Considers Her Cured.

Gentlemen:—I got two packages of your Tonic Heave Remedy last spring and used them. I consider that my mare is cured, and her wind is as good as it ever was. Some people say she will get the Heaves again this winter, but I don't believe it, for she is only seven years old and never had it before.—William Jacobs, Nelsonville, Ohio, Route 3.

Cured One and Helped the Other.

Gentlemen:—The Tonic Heave Remedy you sent me has cured one of my horses, and it did the other a lot of good. I disposed of him, as it was an old case and he never would get entirely well.—E. J. Rose, Big Otter, W. Va.

Poor and Shabby.

Dear Sirs:—Last spring I ordered two packages of your Tonic Heave Remedy, which gave me such wonderful results that I want you to know what I think of it. It brought out a fine young horse that I had just about given up. I sold this horse for \$175. If I had not had your remedy I could not have given him to anybody, he was so poor and shabby.—W. W. Copeland, Fries, Va.

Cured a Seven Dollar Horse.

Dear Sirs:—I used two packages of your Tonic Heave Remedy on a horse of mine that had a very bad case of Heaves, and it cured him. I bought him for \$7 and sold him for \$30.—Bab Ward, Cairo, Okla.

Best He Ever Tried.

Gentlemen:—I used the package of Tonic Heave Remedy that you sent me some time ago, and my horse is all right. He has a sleek coat and is very spirited. Have driven him seven days per week for the last two or three months and he is fine. I don't care to be without the remedy again. It is the best I have ever tried, and I have had occasion to treat horses for several years.—R. L. Clatt, Pembroke, Ga.

Made a Crop.

Dear Sirs:—I would like to have you send me your Vest-Pocket Veterinary Adviser. I ordered some of your remedies about a year ago, and found them to give good results. Can say that your Tonic Heave Remedy beats anything that I ever saw. After using one package of it I made a crop with a mare that I thought was done for good.—J. H. Cox, Salem, Mo., Route 3.

If you have a horse that is disabled by lameness or disease, he cannot be regarded as an asset. You are none the richer by owning him. On the contrary, he is an expense because he cannot earn his keep. If you cure him you are richer to the exact extent of his value when cured. That being true and our remedies being guaranteed, the only chance involved is a chance to increase your wealth.

One of our customers over in Ohio owned a fine horse that he was going to have killed, because the doctors recommended that course after giving him up. He cured the horse with one of our remedies at an expense of \$2, then sold him for \$800, making a net profit of \$798, which was thirty nine thousand and nine hundred per cent on the investment. Did you ever hear of anything that paid better than that? But it doesn't take an \$800 horse to make it worth while. A number of the testimonials in this almanac speak of saving animals worth as much as \$200, which means practically ten thousand per cent profit

Fleming's Colic Cure

If you have a horse, you should have a bottle of Fleming's Colic Cure as a matter of safety.

We know of nothing else that can afford the same degree of protection against Colic loss.

It may be that you have owned horses for years, and not one of them ever had an attack of Colic, but that is no assurance of safety—you may lose your best horse tomorrow.

Colic kills more horses than any other one thing. It is the most common and prevalent ailment that horses have, and every attack is dangerous. It comes without warning and kills quickly, and every horse owner should be prepared to treat it without an hour's delay.

A few cases will prove fatal, regardless of anything that can be done, but they are very few, and the great danger is in being unprepared for such an emergency.

If Fleming's Colic Cure were kept on hand by all who really ought to have it, we predict that the annual Colic loss would be no more than five per cent of the present magnitude.

It is a remedy that is capable of saving millions of dollars every year to the farmers of the country, and there are just two reasons why it is not saving all that it might save—some do not know about it, and some who do know neglect to avail themselves of its protection.

But more and more are realizing that it is worth while to order this remedy, even though no need for it is in sight at the time. The increase of sales tells us that. But more of it should be sold—it is good enough to deserve a sale of a million bottles annually.

We consider that what is said in this almanac about Fleming's Colic Cure, can be of most importance to the largest number of people, because it is of importance to every man who owns a horse, and we hope, therefore, that all will read the letters that follow, for they make it plain what this remedy can do in the way of saving horses.

Fleming's Colic Cure will retain its properties for years if the bottle is kept tightly corked. It is easily given and each bottle contains eight doses. One dose cures most cases, but a few will require two or three. Full directions and a description of the symptoms of the various forms of Colic accompany each bottle.

Include Fleming's Colic Cure when making up an order. Even if you never need it, the satisfaction of having it will be worth more than its cost.

Mailed prepaid for \$1.

See assortment offer on inside of back cover.

Had Been Doctored All Day.

Dear Sirs:—I was called out one night last week to doctor a horse for Colic after a veterinarian had had him all day. The horse got a relapse and they said he would die. I gave him two doses of your Colic Cure and in two hours

I had him up and eating hay. Your remedy has given perfect satisfaction.—D. C. Steelman, Livery & Sales Stable, Pleasantville, N. J.

Quick Work.

Gentlemen:—Please send another bottle of Colic Cure, for which find money order for one dollar enclosed. We have cured some very bad cases with it and have always had the horses up and neighing for food in half an hour.—Poat Bros., Bulb Growers, Richmond, Va.

Uses Our Line.

Gentlemen:—Please send one package of Tonic Heave Remedy and two bottles Veterinary Eye Lotion, for which I enclose two dollars. All the remedies included in the six-dollar order that I sent you some time ago have been perfectly satisfactory. I used the Colic Cure again yesterday on a very severe case of spasmodic colic and had the mare easy in an hour. Am using your line exclusively, most of which I buy from the local dealer.—A. A. Santy, D. V. S., Burwell, Nebraska.

Found Quicker Help.

Dear Sirs:—Enclosed find money order for one dollar, for which please send a bottle of Colic Cure and a copy of your Veterinary Adviser. These are for Mr. John Janney, but you may send them to me and I will deliver same. I have used your Colic Cure and will never be without it, as I find it very effective. Just last evening Mr. Janney came to my place to phone to town for a doctor. I gave him the Colic Cure. He gave his horse one dose and it was all right in a few minutes, so he now wants a bottle of his own.—O. L. Fergus, Gaston, Ind.

Could Hardly Breathe.

Dear Sirs:—Please send us another bottle of your Colic Cure, as we do not want to get out of it. We had a horse the other night that had colic and he became bloated so bad that he could hardly breathe. When we saw him we thought we might as well give him up, but we brought him out all right with your Colic Cure.—Will Wright, Copemish, Mich., Route 2.

Best the Doctor Ever Used.

Sirs:—I enclose fifty cents, for which please send me a bottle of your Eye Lotion. I have tried your Colic Cure and find it to be the best remedy I have ever used.—H. G. Clark, V. S., Fay, Nevada.

One Dose Saved Him.

Dear Sirs:—Enclosed find one dollar, for which send me another bottle of your Colic Cure. I am nearly out of it. Today I saved a \$200 horse with one dose. He was down, rolling and groaning and trembling all over, and in three-quarters of an hour he was up again and all right, except that he appeared a little dull for a short time. The medicine is sure O. K.—L. J. Niendorf, Lillian, Idaho.

Seeing is Believing.

Gentlemen:—Enclosed find three dollars, for which send me three bottles of Fleming's Colic Cure. It is a wonderful medicine. I consider that it saved the life of a \$300 horse for me. I want two bottles for myself and one for a neighbor, who was with me when I used it on my horse, and he saw how wonderful the result was.—Perry Youst, Amos, W. Va., Route 2.

Wouldn't Be Without It.

Dear Sirs:—I enclose one dollar, for which send me one bottle of Colic Cure. Yesterday a valuable horse of mine was taken with Colic. I used two doses of your Colic Cure and cured him. I have but one small dose left and I wouldn't think of being without it, so please send by return mail.—A. L. Robinson, Rummerfield, Pa., Route 13.

Doctor Recommends It.

Sirs:—I feel a desire to drop you a few words regarding my experience with your wonderful Colic Cure. Dec. 14th I was called to see a fine

horse which I found in the last stage of Spasmodic Colic. They had given him enough dope of different kinds to kill two horses, which made the case more stubborn, of course. I gave him a teaspoonful of your Colic Cure in a pint of sweet milk. He became easier, but in about twenty minutes he fell with another spasm. I repeated the dose, and in less than fifteen minutes he was a well horse. I have nothing but praise for your medicines and I wish you much success.—Tom Marlin, V. S., Blanket, Texas.

Knocks Colic.

Gentlemen:—Please send me a bottle of your Colic Cure for the remittance enclosed. One of my horses was taken bad with the Colic today, and I went to one of my neighbors and he loaned me a bottle of your Colic Cure. I gave the mare two doses and she is up and eating now. It is surely the stuff to knock Colic in the head.—R. N. Arthur, Okobojo, S. D.

Horse Dropped.

Dear Sirs:—I have used your remedies and have faith in them. I had a chance to test your Colic Cure the other day. A neighbor's horse dropped in front of my place with Colic, and I thought he was dying, but I gave him your Colic Cure and he was saved. He is worth \$200 today and it was nothing but your Colic Cure that saved him. It was the worst case I ever saw, and the horse would have died before a doctor could have come. Enclosed find three dollars for one bottle of Colic Cure and one bottle of Fistula and Poll Evil Cure.—Elmer Jacobs, Dansville, N. Y., Route 5.

Saved \$175 Horse.

Gents:—Enclosed find postal order for one dollar, for which send me one bottle of Colic Cure. The last bottle I got saved the life of a four-year-old horse worth \$175. I have some of the last bottle, but want plenty on hand in case I need it.—John G. Neubauer, Fairmount, N. D., Route 4.

(Continued from page 26.)

Crop after crop soon deplete the supply of nitrogen and the winter rains leach it from the soil; it is more soluble than the other plant elements. Roots of plants, weeds and grasses, as they decompose, release the nitrates and unless some cover crop is sowed to take up these elements they are lost before the next crop is planted in the spring. Many plants, such as the clovers, cow peas, soy beans and vetch, are natural nitrogen gatherers from the air and deposit it in the soil through their roots. This is how clover benefits the land. An acre of clover, alfalfa or cow peas will deposit more nitrogen in the soil on one acre in one year than will a whole ton of the best fertilizer. Rye is often recommended as a cover crop, not because it adds any fertility, except humus, but because it takes up the soluble nitrates and conserves them for the following crop when plowed under and prevents their being washed out of the soil. Any cover crop sowed in the fall is good, such as rye, wheat, turf oats, crimson clover or vetch, and for the same reason, they prevent soil leaching. Remember, the nitrates are soluble. A good crop of weeds is better than having the land bare, because they take up the soluble nitrates and return them to the soil when they decay. Study the chemistry of your soil and do not have any bare fields in the winter time to be leached out by the rains.

Making Cider Vinegar

It must be remembered that there are two important changes which take place in the conversion of fruit juices into vinegar. The first step involves the changing of the sugar in the juice into alcohol, while the alcohol is afterwards converted into acetic acid. The aim, therefore, should be to bring about alcoholic fermentation, and this is done by leaving the cider in open casks if possible, or in any event in barrels having the cork or bung removed. Place a loose plug of cotton over the hole in

(Continued on page 30.)

Fleming's Sweeny Cure

Don't neglect Sweeny. Some cases will recover without treatment, but it isn't safe to depend on that. To do so is to take a chance that the horse will never be right again.

It is almost equally bad to employ some of the severe procedures that will be recommended to you if you ask around among your neighbors.

Fleming's Sweeny Cure is prepared especially for Sweeny and Shoulder Lameness. Its use does not involve cutting, puncturing the skin, inserting rowels, or anything of the kind. You merely apply lightly upon the surface, and upon only a small surface at that, and it penetrates sufficiently. It stimulates the tissue forming processes, so that the wasting of the muscle ceases and the rebuilding begins. If the horse is not lame, he may do slow and easy work on smooth ground during his recovery.

We guarantee Fleming's Sweeny Cure—your money back if it ever fails.

Mailed prepaid for \$1.

See assortment offer on inside of back cover.

Cured Six.

Dear Sirs:—About a year ago I ordered of you a bottle of your Sweeny Cure. One application cured a mule of Sweeny that had been lame for four months, and that same bottle has cured two other mules of Hip Sweeny and three with Shoulder Sweeny.—A. D. Curtis, Clerk of the Circuit Court, Shelbyville, Tenn.

Others Failed.

Dear Sirs:—I am glad to tell you that the Sweeny Cure I sent to you for last spring has cured my mare. All I used was two applications and I have nearly all the bottle left. I tried other remedies, but all failed to do any good. I am a thousand times obliged and would guarantee your Sweeny Cure to any one.—S. R. Tennant, Amos, W. Va., Route 2.

Hip Sweeny.

Gentleman:—Your Sweeny Cure is all that is claimed to be. I had a mule that had a bad case of Hip Sweeny, and your Sweeny Cure cured it sound and well in two weeks.—Chas. Warren, Algood, Tenn., Route 2.

Dragged One Foot.

Gentlemen:—Your Sweeny Cure cannot be beat. To any reliable man you could just as well offer to refund one thousand dollars as one dollar in case it failed. I believe that it is a sure cure. My horse dragged one foot, but two treatments cured it and you cannot tell that she was ever sweenied at all. You can print my letter if you want to, for everybody out here knows me.—Myron Millis, Whitewater, Wis., Route 4.

Cured a Dozen.

Dear Sirs:—I have used your Fistula Cure and Sweeny Cure with fine success. I have cured as high as 12 to 15 horses with one bottle of your Sweeny Cure.—John Kohl, Kankakee, Ill., Route 1.

Had It a Year.

Dear Sirs:—I must admit that your Sweeny Cure is most wonderful. I had a horse that

Fleming's Veterinary Healing Oil

People generally are too careless in the treatment of small wounds.

They are apt to apply whatever is handiest, and consider it good enough.

But it doesn't take much of a wire cut to ruin a horse sometimes, if treated carelessly in this way or neglected altogether.

Fleming's Veterinary Healing Oil is a product of the same chemical skill that produced Fleming's other remedies, and, like the others, it is a wonder in the work it does.

Use it for cuts, galls, old sores, burns and everything that ought to heal, whether on an animal or human being.

Order now so that you will have it—you are sure to have use for it some time.

Mailed prepaid for 50 cents.

See assortment offer on inside of back cover.

Nothing Better.

Dear Sirs:—Last summer I had a colt cut very badly by a barbed wire. I sent for your Healing Oil, and at the same time I asked you if there was anything that would be better for such a cut. You answered, "No," and you were right. Nothing could have been better. The colt today shows no scars or lameness. It was a very bad cut, but the Oil did its business all O. K.—W. O. Johnson, Atlantic, Iowa, Route 2.

Bad Wire Cut.

Gentlemen:—You will find enclosed an order for two bottles of Healing Oil, which I think is the finest stuff for wire cuts that I ever saw. I had a horse cut on the muscle of the front leg. There was a raw sore from the arm of the leg down to his knee. For eleven months I used everything I could hear of, but nothing did any good. I got some of your Healing Oil and one bottle healed it sound.—W. B. Gilleland, Ewalt, Mont.

Suffered 18 Years.

Dear Sirs:—I have used your Veterinary Healing Oil very successfully upon my stock, and it healed up every sore that I put it on, but what I want to tell you about is how it healed an old sore on my mother's face. It had caused her a great deal of suffering for 18 years, and I will not try to describe all the treatment she has undergone. The last physician to treat this sore was Dr. of Kansas City, Mo., and he left her face in worse condition than when he started. The sore was caused by being bitten by a pet squirrel. When she started using your Healing Oil the sore was two inches long and an inch wide; very nearly the entire cheek was a sore. Her face is entirely healed now. Only three bottles of the Healing Oil were used, costing but \$1.50, and they did the work after having spent hundreds of dollars on physicians and medicines. I know of no words that would express our feeling of gratitude.—John P. Downey, 824 Bordeaux St., New Orleans, La.

We publish the above letter because it so clearly demonstrates the superior healing properties possessed by this remedy, and not with a view to urging its sale for human use. Our remedies are intended for veterinary purposes, and we have no wish to expand into the field of human ailments. However, anticipating questions, will say that Fleming's Veterinary Healing Oil is just as healing upon human flesh as

any other, and may be used with entire safety. If we were to put out a general healing remedy for household use, we could not improve upon this one, nor would we change the formula in any way.

Milk to a Pound of Butter

The true ratio of milk to butter is determined by the percentage of butterfat in the milk. Below we present a table showing the pounds and quarts of milk, starting with 3-per-cent-fat milk and proceeding by one-tenth of one per cent increase up to 6-per-cent-fat milk. In this computation we have used 2.15 pounds as the weight of a quart of milk, and have reckoned the butter as 85.7 per cent, the usual ratio. The first column shows the fat percentage of the milk, the second column shows the number of pounds, and the third column shows the number of quarts of milk of the given degree of richness required to make one pound of butter, the computations being carried to the third decimal place.

Butterfat	Pounds Milk to Pound Butter	Quarts Milk to Pound Butter

Fence Post Observations

Observations and experiments undertaken by the Ohio Experiment Station have shown that osage orange appears to be far superior to other woods for fence posts, with yellow locust and red cedar next. It makes no difference which end of the post is put in the ground, except that preference should be given to the sounder or larger end. In stiff clay soil the posts generally rot just beneath the surface of the ground, whereas in porous, sandy, or gravelly soil they usually rot throughout the buried portion. Posts standing in constantly wet soils last longer than in soils which are alternately wet and dry. Seasoning does not seem to have any marked effect on durability. The evidence appears to show that it is not a good time to cut posts just as the tree begins to grow in early spring. The wood at the center of the tree is not so good as that just inside the sap wood. In an average lot of so-called first-class posts on the market a number can usually be selected that are defective, though they may appear sound and firm. The defectiveness is usually indicated by a somewhat darker color than normal, especially near the center of the tree.

Our Way of Selling

Fleming's Remedies are not very generally sold in drug stores. The reason is because our leading remedies are specialties for which there is comparatively little demand in any one locality.

For instance, outside a few of the best cattle sections, there may be entire counties in which there are not half a dozen cases of Lump Jaw in a whole year. In the same county there may be anywhere from half a dozen to a hundred or more drug stores, and these druggists could not afford to keep Fleming's Lump Jaw Cure upon their shelves for the sake of supplying so limited a demand. It is just the same with Fistula and Poll Evil, and some of the other diseases we treat.

Therefore, our method of doing business is to deal directly with each customer. Orders are received by mail, and the remedies are sent by mail or express, charges prepaid and safe delivery guaranteed. In this way the scattering business is gathered together, the freshness of the remedies is assured, the customer is protected against imitations, and we are placed in a position to offer special help when required.

This has been our way of selling since we first began business in 1896, and it has proved satisfactory in all respects, to our customers and to ourselves.

Any Six-Dollar Assortment for Five Dollars

Two bottles of Knee-Sprung Cure, or three bottles of any of the two-dollar remedies, or any kind of an assortment amounting to Six Dollars at the prices quoted, will be supplied for Five Dollars.

To secure this reduction the remedies must be ordered direct from us, and the entire six-dollar lot must be ordered at one time.

Fleming's Guarantee

The following guarantee applies according to the claims made for our remedies in our Veterinary Adviser and other printed matter. Its purpose is to insure you your money's worth or your money back. We consider it a guarantee such as any honest business house should want to give to an honest customer.

If any one of Fleming's Remedies doesn't do what we say it will do, we will refund to you its price, you to be the judge and your word to go.

Price List of Fleming's Remedies

Fleming's Remedies are sent by mail, postage prepaid, on receipt of price, and safe delivery is guaranteed. Full directions are in every package. Remittances are always safe when made by Post Office or Express Money Order, or by Registered Letter. See Assortment Offer in opposite column.

Be sure to write your name and address distinctly.

Fleming's Lump Jaw Cure.....\$2.00

More than one bottle is seldom needed for a case, and as a general rule less than a bottle is sufficient.

Fleming's Spavin Cure (Liquid).....\$2.00

One bottle is usually sufficient for several cases. No case needs more than a bottle.

Fleming's Spavin and Ringbone Paste.....\$2.00

Used only upon well-developed cases of Bone Spavin, Ringbone and Sidebone causing marked lameness. One bottle is always enough for a case, and usually enough for several.

Fleming's Fistula and Poll Evil Cure.....\$2.00

Most cases are cured with one bottle or less. An exceptionally obstinate case may need as much as three bottles, but such instances are rare.

Fleming's Knee-Sprung Cure.....\$3.00

Should be used at the start of the trouble. The average quantity needed is about two bottles.

Fleming's Tonic Heave Remedy.....\$1.00

The average quantity for a case of Heaves is about two packages. Some are cured with one, while others require three.

Fleming's Sweeny Cure.....\$1.00

No case needs more than one bottle. Most cases are cured with much less.

Fleming's Colic Cure.....\$1.00

Quantity needed for a case, one to three doses. Bottle contains eight doses.

Fleming's Veterinary Healing Oil..... 50c

Quantity needed depends upon what you are using it for. It is applied lightly and a bottle goes a long way.

Fleming's Veterinary Eye Lotion..... 50c

Each bottle, when diluted with water, makes a quart of Lotion right strength to use.

Fleming's Chemical Hornstop..... 50c

Each tube sufficient for 25 to 50 calves. This preparation will not keep from year to year.

Fleming's Fistula Syringe..... 50c

Capacity of syringe, one-eighth ounce; length of nozzle or pipe, three inches.

Extra Nozzles for Fistula Syringe, each 20c

We do not supply half sizes of any of our remedies.
